# DESIGN DETAILS THAT MAKE ALL THE DIFFERENCE

Our designers probably use our gear more than anyone. And we think this is what makes our design approach just a little bit different. When we're out in the field and a piece of gear doesn't work quite the way we'd like it to, our design process begins.

It begins with that gut feeling that a piece of gear could be better and, eventually (through lots of testing, sampling and re-testing), we engineer a product that has been designed down to the most minute details. Because design details really do make all the difference in the outdoors.

## SIGMA POT PARAMJEET SINGH PRODUCT DESIGN

"We wanted the same technical attributes of our ultralightweight AlphaPot™ for the people who prefer the durability of stainless steel. There are definitely lighter materials out there, but we still managed to make our SigmaPot™ range surprisingly light.

Design details like our LID KEEP™ are already appreciated by campers—allowing them to hang the lid off the side of the pot, rather than placing it on the ground—but I'm pretty proud that we designed a handle that folds away but is still sturdy and secure. It doesn't rattle, which is rare in these kinds of pots."

## WATERCELL TOM SCHILPEROORT PRODUCT DESIGN

"Our new Watercells are, essentially, a water storage system that does almost everything you need it to do in the field. They're compatible with industry standard water filters and hydration hoses. And the Watercell X has a flow-control spigot to dispense drinking water and comes with a mini showerhead. Our webbing strap system also makes our Watercells easy to carry, lash onto kayaks or bikes and hang from trees. It's all of these little details that make this system so easy and useful."

## PILLOW RANGE TIM MILLER PRODUCT DESIGN

"When the design team goes camping in Australia, we often sleep without a tent. After all, the weather here is usually pretty excellent so hammocks provide a super lightweight and compact sleep set-up.

PillowLock™ was born from the irony that our incredibly light pillows tended to move (or blow away!) in the night. I literally had my pillow blow off into the bush when I was tarp sleeping. PillowLock™ is so simple, but these handy little patches make all the difference to your chances of a good night's sleep in the bush."

## SLEEPING MATS BRENDAN SANDO PRODUCT DESIGN

"The design for Air Sprung Cell™ mats came from wanting to try and mimic a pocket spring mattress—where hundreds of individual springs conform to your body shape to provide more even support— using inflatable technology.

Our Air Sprung Cell™ mats are known for being lightweight, compact and comfortable but not everyone knows that the quality materials and manufacture on these mats are second to none. We've had virtually no warranty claims on our ASC mats (something we're really proud of), so you can really trust that our gear will perform, time and again."

# TO EQUIP AND INSPIRE

We tend to work in cycles at Sea to Summit. Last year was a big cycle for new products, updates and refreshes. We overhauled our sleep systems offering, created 11 new product lines from scratch and released 186 new pieces of gear into the wild.

This cycle is focused on providing product information, articles, video, photos and more to help educate and inspire our customers to get outdoors, try out our gear and share their experiences.

This year we want to show outdoor users how to improve their sleep and increase their performance with our customisable sleep systems. We've already created an online guide to teach people about the range and we plan to do much more to assist our customers in finding their perfect sleep set-up. Visit [seatosummit.com/newsleepsystems](http://seatosummit.com/newsleepsystems) for a taste of what's to come.

We'll also be showcasing how all our other products can make life easier and more enjoyable outdoors—from our stainless-steel SigmaPots™ and Ultralight Hammock Set to our Ultra-Sil™ Nano™ Daypack and Shopping Bag.

## STORIES FROM THE TRAIL

Inspiration means sharing more of our stories—starting with the launch of our new blog. Here we'll be sharing behind-the-scenes action from our design team, expert advice from gear-geeks, and stories from the trails. Keep an eye out on our website and social channels.

## A FEW DROPS OF NEW GEAR

While inspiration is our mantra this cycle, we've still snuck in a select few new products to keep you hydrated or dry!

Our new Watercell X on page 87 is your complete water storage solution for trail, road and water-based adventures and the new Watercell ST on page 86 is our more minimalist model. Heading to the tropics? Grab our Jungle Hammock and Tarp (page 58-59) for a lightweight sheltered and bug-free suspended sleep. Then there's our new DeltaLight Tumbler (page 82), a cleverly engineered Tritan™ camping cup, designed to replace the glass jam jar our co-owner and head designer, Roland Tyson, is fond of drinking wine from. Inspiration can always be found outdoors and, sometimes, at the bottom of a glass of red.

# IMPROVE SLEEP. INCREASE PERFORMANCE.

## DISCOVER OUR SLEEP SYSTEMS RANGE TO MAXIMISE YOUR SLEEP AND ADVENTURES.

Our technical range of sleeping mats, bags, pillows and liners are engineered to mix and match for maximum performance.

Whether you're kitting up for your next high-altitude expedition or planning an around the world adventure, buying gear is about what works best for you and having options available to suit your specific needs.

 Our women's specific range does just that — it provides a choice of sleeping bags and mats that work for women at the summit, along the trail and everywhere in-between.

Find the perfect setup for your adventures here:

## VIDEOS OF DESIGN DETAILS THAT MAKE ALL THE DIFFERENCE

▶ FREE-FLOW ZIP™

Strategically placed zips offer ventilation options and freedom of movement

▶ WAVELOFT™

Our synthetic bags use a unique wave-like construction of synthetic insulation to trap pockets of warm air

▶ AIR SPRUNG CELLS™

Individual cells that conform to your body shape and disperse pressure evenly

▶ ULTRA-DRY DOWN™

Water-repellent treatment protects down from the negative effects of moisture

▶ DELTA CORE™

Removes excess weight and bulk from self-inflating mats without compromising comfort

▶ PILLOW LOCK™

A nifty mechanism to lock your pillow into place

## VIDEOS BRING OUR TECHNICAL PRODUCTS TO LIFE

 **Ascent Ac SLEEPING BAGS**

Be prepared for the unpredictable with our adaptable Ascent™ Series sleeping bags. This range has everything you want for most adventures and then some.

 **Spark Sp SLEEPING BAGS**

To minimise heat loss, we've added a zipper draft tube, hood and neck collar, and expedition sizing creates space for layered clothing or extra wriggle room.

 **AEROS™ DOWN PILLOW**

Combining the ultralight properties of our inflatable pillows with the warmth and comfort of down, our new Aeros™ Down Pillow is the ultimate lightweight luxury.

# YOUR SLEEPING MAT IS THE FOUNDATION FOR A GOOD NIGHT'S SLEEP

It's the first component of your sleep system and what's going to insulate you from the cold ground and cushion you from the bumps. Our comprehensive range of Air Sprung Cell™ and Self Inflating mats provide choice at every altitude—from ultra-light multi-day trail runs in the alps to 4WD overlanding in the desert, our mats make sleeping outdoors comfortable.

## Extensive testing results in products you can trust

Sea to Summit sleeping mats undergo extensive testing long before they make it on any outdoor adventure so you can sleep comfortably—and confidently.

Every single mat we manufacture is overinflated for 24 hours and comes with a serial number for trackability. Within each batch, further rigorous testing ensures structural and functional durability under extreme conditions.

We test our mats to destruction for long-lasting performance.

## New ASTM F3340-18 R-Value Testing

A sleeping mat's R-Value is the equivalent to the EN13537 Temperature Rating System for sleeping bags—it helps you determine how well a mat will insulate you from the cold.

From late 2019, we will be using the new industry standard ASTM F3340-18 test to provide R-Values for our mats. This new testing standard has been driven by industry leaders wanting a universal system to enable users to compare mats, from different brands, like-for-like.

While we have always provided independently tested R-Values for our mats, many brands will now start publishing R-Values for the first time. This is a win-win for the industry and users.

This new way of testing the insulative properties of mats will see some updates to our current published R-Values. It's important to note that where values do change, it doesn't signify a drop or increase in warmth—it identifies a need to interpret the ratings differently.

As the new standard is integrated across the industry, we will be helping to educate users on the new testing parameters and how to translate the readings into real world situations.

## Women's specific shape and insulation

Using anthropometric data to reveal how best to cater for a woman's size and weight distribution, the way they store heat and the way they sleep (on their side, mostly), our women's specific mats are wider from hip to knee and narrower at the shoulder. They're also warmer in core body zones for all-season sleeping comfort.

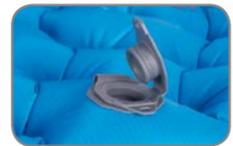

# DESIGN DETAILS THAT MAKE ALL THE DIFFERENCE

## Multi-function Valve

Our award-winning Air Sprung Cell™ mats' valve integrates an inflate port with a one-way valve to prevent air loss during inflation, a rapid aid dump deflate port, and a fine-tune button to adjust comfort.

Closed - compact low profile

Inflate through one-way valve

Press orange button to slowly release air to fine tune comfort

Rapid air dump deflate port

## PillowLock™

Easily secure your Aeros™ pillow to your Sea to Summit Air Sprung Cell™ or Self Inflating mat for a slip-free sleep. Designed to keep your pillow exactly where it's meant to be—on your sleeping mat—our unique PillowLock™ hook and-loop fastener patches come standard with all our mats.

## Repair Kits

Both our Self Inflating and Air Sprung Cell™ mats include a small repair kit including patches for repairing punctures in the field.

# SELF INFLATING MATS

Thick, light and easy-to-use.

From backpackers trying to shed grams to car campers who want glamping luxury, our range of self-inflating mats provide consistent warmth along the full length of the mat in a compact, comfortable, easy-to-use package.

## Delta Core-V™

In our lighter models, Delta Core-V™ vertical coring technology is applied to remove 20% of the weight and bulk of the mat's polyurethane (PU) foam. We use sophisticated pressure-mapping data to define body contact areas which becomes the blueprint for our distinctive graduated core pattern.

In body contact areas where extra warmth and support is needed - shoulders, hips and feet - the vertical core holes are smaller. In the less critical areas, more foam has been removed to minimise the weight and packed size. Delta Core-V™ technology is used in our Ultra Light SI and Camp Mat SI models.

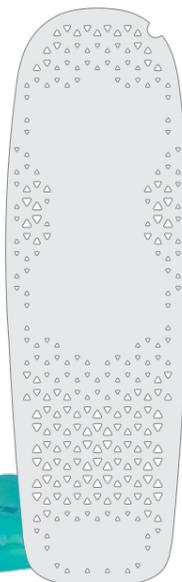

Awards

## Women's Specific Mats

Designed to meet the needs of female physiology, we've developed unique Delta Core™ and Delta Core-V™ profiles for our Women's Mats to provide extra warmth and sleeping comfort.

In our Women's Ultralight S.I. Mat, our Delta Core-V™ graduated pattern uses a mix of smaller holes and solid foam under core body zones to achieve increased warmth. In our Women's Comfort Light and Comfort Plus S.I. Mats, we adjust the depth and shape of our Delta Cores™ to leave more insulating PU foam intact, creating a warmer core body zone and greater insulation from the outside elements.

## Delta Core™

Our Delta Core™ process uses large horizontal triangular cores to remove 40% of the mat's PU foam weight and bulk. This patent-pending technique is a truly innovative approach to producing a minimal packed size and weight mat while maximizing comfort and thickness.

Importantly, this coring technique has the additional benefit of keeping the top and bottom surface of the PU foam completely intact. This ensures consistent warmth along the full length of the mat, avoiding the vertical holes or frame-like gaps that have traditionally allowed warmth to leach downwards and away from the body. The intact foam surface also provides significantly improved bonding of the foam to the mat shell fabrics, which greatly reduces the chance of delamination.

The shape and size of the Delta Cores™ are adjusted across the different thicknesses of our mats to ensure strength and durability, while still giving you support and self-inflating performance. The horizontal Delta Core™ technique is used in our Comfort Light SI, Comfort Plus SI and Comfort Deluxe SI models.

## Comfort plus S.I.™ SELF INFLATING

**Engineered for women to provide extra warmth and comfort**

Women's specific Delta Core™ profile for warmer core body zones

- Wider at the hip and narrower at the shoulder
- Multi-functional, high flow-rate valve
- Anti-slip print on base keeps it in place
- A luxurious 30D stretch knit fabric on top for a quiet and soft, next to skin feel
- Lightweight 30D polyester with extrusion laminated TPU used on base for rugged durability
- PillowLock™ attaches your Aeros™ pillow to your mat, holding it in place for a slip-free sleep

Code	Size	Dimensions	Rolled Size	Weight
AMCICPWR	Women's Regular	170x 53cm	ø18.5 x 27	925g
AMCICPWL	Women's Large	183 x 58cm	ø19.5 x 30	1095g

## Comfort light S.I.™ SELF INFLATING

**Lightweight all-season comfort and performance**

Thicker, lighter self-inflating mattress with Delta Cores™

- Multi-function, high flow-rate valve
- Anti-slip print on top and base keeps it in place
- Made from lightweight 30D polyester with extrusion laminated TPU
- Large horizontal triangular cores reduce the weight and bulk without sacrificing support and comfort
- PillowLock™ attaches your Aeros™ pillow to your mat, holding it in place for a slip-free sleep

Code	Size	Dimensions	Rolled Size	Weight
AMCICLS	Small	170 x 51cm	ø14 x 26cm	595g
AMCICLR	Regular	183 x 51cm	ø14.5 x 26cm	650g
AMCICLL	Large	198 x 64cm	ø15.5 x 33cm	880g

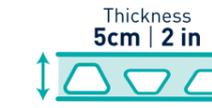

## Comfort light S.I.™ SELF INFLATING

**Engineered for women to provide extra warmth and comfort**

Women's specific Delta Core™ profile for warmer core body zones

- Wider at the hip and narrower at the shoulder
- Multi-function, high flow-rate valve
- Anti-slip print on top and base keeps it in place
- Continuous foam layer on top and bottom of Delta Cores™ eliminates cold spots along full mat length and provides better bonding with the shell fabrics
- Lightweight 30D polyester with extrusion laminated TPU used on top and base
- Large horizontal triangular cores reduce the weight and bulk without sacrificing support and comfort
- PillowLock™ attaches your Aeros™ pillow to your mat, holding it in place for a slip-free sleep

Code	Size	Dimensions	Rolled Size	Weight
AMCICLWR	Women's Regular	170x 53cm	ø16 x 27cm	665g
AMCICLWL	Women's Large	183 x 58cm	ø16.5 x 27cm	775g

# AIR SPRUNG CELL™ MATS

Comfortable, compact and supportive

From ultra-light and fast treks above the tree line to more relaxed extended basecamps, our award-winning Air Sprung Cell™ Sleeping Mats provide air cushioned comfort from the lumps and bumps beneath you.

Awards

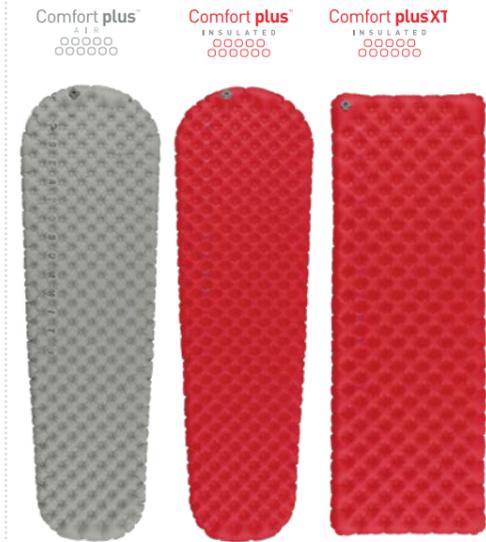

**Ether light - Single layer design** ○○○  
Larger air pockets are created by using many looped TPU baffles which connect the top and bottom fabric layers with our Air Sprung Cell™ dot weld pattern. The looped baffles allow the top and bottom layers to be positioned further apart creating larger pockets of air when inflated that require less fabric overall.

**Ultra light - Single layer design** ○○○○  
Constructed as a single layer of medium resolution cells, our Ultra Light range gives you the lightest and smallest packed size mat without compromising on our Air Sprung Cell™ comfort.

**Comfort light - Hybrid layer design** ○○○○  
Our Comfort Light range features a double layer of cells in the torso for increased comfort and insulation, and a single layer of cells in the head and legs to reduce weight.

**Comfort plus - Dual layer design** ○○○○○○  
Using two high resolution cell layers that can be pressurised independently provides ultimate flexibility in comfort adjustment and protection from rough terrain. Offset for more uniform insulation and cushioning, the Dual Layer design also ensures a level of built in redundancy allowing the mat to function even if one of the layers is punctured.

## Air Sprung Cells™

Air Sprung Cells™ are the core technology behind our air mat range and are the reason you will sleep better on our air mats. Instead of the typical baffled construction, our air mats are constructed using a dot-weld pattern to create a high surface-area matrix of interconnected chambers we call Air Sprung

Cells™. Much like a pocket-spring mattress, as each Air Sprung Cell™ deforms independently, the mat conforms to your body shape which feels softer and more comfortable by maintaining more body contact area and even dispersion of pressure.

## Thermal insulation technology

Exkin Platinum® is a very lightweight, quiet non-woven fabric that has a thin metalised layer applied to the surface which reflects radiant heat back to the user.

THERMOLITE® insulation, designed for ultimate performance, is made from specially engineered fibres to achieve a high CLO value with low weight. THERMOLITE® HL-1 high loft insulation is a fibrefill constructed with a unique 3D crimp of hollow-core and solid fibres, which provide excellent lightweight warmth with superior durability. The THERMOLITE® insulation lofts up inside the Air Sprung Cells™ to prevent convective heat loss from your warm body to the cold ground.

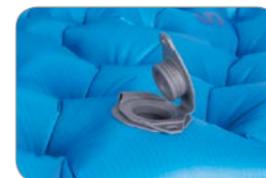

Exkin Platinum® and THERMOLITE® are combined to great effect in each of the insulated versions of our mats, and our women's mats have an extra thick layer of THERMOLITE® for even more warmth.

## Multi-function valve

To make inflation and deflation easier we have developed the multi-function valve. The valve integrates an inflate port with a one-way valve to prevent air loss before you seal the valve, a rapid air dump deflate port, and a fine tune button to adjust for comfort, in one compact, low profile unit.

Closed - compact low profile

Inflate through one-way valve

Press orange button to slowly release air to fine tune comfort

Rapid air dump deflate port

## 30/40D Nylon face fabric

We developed the 30/40D Nylon face fabric to hit the balance between weight and durability. The 40D warp yarn (running lengthwise providing the fabric framework) adds strength while the 30D weft yarn (weaved across the warp yarn) reduces the overall weight of the fabric and creates a textured weave. On the inside we apply a bright white extrusion laminated TPU to make the fabric airtight and weldable. On the outside we apply a thin acrylic coating to reduce the slipperiness of the surface, increase puncture resistance and to aid puncture repair with self-adhesive patches.

**air:stream PUMPSACK**  
Integrated into the included stuff sack

The Airstream™ Pumpsack is now integrated in the base of the stuff sack included with every Air Sprung Cell™ sleeping mat.

Harnessing the Bernoulli effect means the Airstream™ can be inflated with a single breath and fill a Sea to Summit air mat fast, with minimal breath condensation. Inverting the Pumpsack makes it compatible with our smaller 15mm mini multi-function valve, now featured on the updated Aeros™ pillow range.

The new combined stuff sack Airstream™ Pumpsack weighs between 37g and 60g depending on the size and model of mat.

## Extrusion TPU lamination

Our TPU coating is applied through a process unique to the medical and aeronautical industries. Extrusion lamination is more durable, consistent and enables us to use our own TPU formula. It is vastly superior to roll-to-roll lamination, which is used in all other outdoor products at present and can suffer from delamination issues.

We have also introduced an anti-microbial treatment to our TPU formula to prevent mould or fungal growth inside the mattress. While we do have two superb pump options, the Airstream™ and Jet Stream, the anti-microbial treatment means you can go ultra-light and inflate with your breath.

# Etherlight™ XT AIR

## Our lightest and thickest full size Air Sprung Cell™ mat

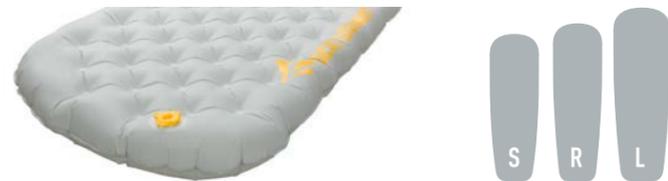

Perfect for side sleepers, the extra height of this mat lets hips sink deeper into it without touching the ground.

Larger air pockets are created by using many looped TPU baffles which connect the top and bottom fabric layers with our Air Sprung Cell™ dot weld pattern. The looped baffles allow the top and bottom layers to be positioned further apart creating larger pockets of air when inflated that require less fabric overall.

- Extra thick (XT) loop baffle Air Sprung Cells™
- Lightweight, quiet and grippy 30/40D Nylon fabric, field repairable with included self-adhesive patches
- Ultra-Fresh® anti-microbial treatment is added to the TPU formula to prevent internal mould growth
- Air Sprung Cells™ for a more comfortable sleep
- Multi-functional, high flow-rate valve
- PillowLock™ attaches your Aeros™ pillow to your mat, holding it in place for a slip-free sleep

Thickness  
**10cm | 4in**

R-value  
**1.2**  
ASTM F3340-18

XT means extra thick

Code	Size	Dimensions	Rolled Size	Weight

# Comfort plus™XT INSULATED

## eXtra Thick (XT) and wide for extra comfort

Our updated Comfort Plus XT™ Insulated Rectangular Air Mat provides a generous 8cm of air cushioned comfort, with a dual-chamber design where each layer can be pressurised independently: inflate the top layer to your personal comfort while maintaining a high-pressure base layer for protection from rough terrain.

Utilising a wider Air Sprung Cell™ dot pitch to create larger pockets of air for eXtra Thickness (XT), this mat combines a lightweight 30/40D Nylon fabric, Exkin Platinum® and THERMOLITE® insulation for increased warmth while minimising weight and packed size.

Wider than our standard Air Mats, the Comfort Plus XT™ offers a little more room to move around and the extra height is perfect for side sleepers as it allows your hips to sink deeper into the mat without touching the ground.

## SLEEPING MAT ACCESSORIES

### Jet Stream Pump Sack

The Jet Stream is our efficient sleeping mattress pump that doubles as a stuff sack. The pump works on a concertina action. Multiple one-way air intake ports inflates the pump quickly on the upstroke. On the down stroke, this air is expelled into the mat through the centre valve plug. Each stroke delivers more than a lung-full of air without making you dizzy or adding moisture into the mat. The Jet Stream stores small and flat, or can be used as a stuff sack for your sleeping mat or other gear.

- Lightweight TPU base has finger loops to hold pump onto mat
- Roll-top closure can be used as hand strap
- One-way air intake ports surround centre valve plug output
- Made from 30D Ultra-Sil™

30 D ULTRA-SIL™

### COOLMAX® Fitted Sheet

Our COOLMAX® fitted sheets allow you to sleep directly on your sleeping mattress in warm environments removing that sweaty feeling.

- Wicks moisture for a more comfortable night's sleep
- Two drawcords at either end to secure onto mattress
- Machine washable and quick drying
- Available in two sizes to fit all Sea to Summit sleeping mats (except Comfort Deluxe SI Large Wide or Double)

### Coupler Kit

Ideal for snugglers, the coupler kit is a tiny addition to any pack, but makes such a difference to sleeping mat users who want to stay close. Can be used with any combination of our air mats.

### Airstream™ Pump Sack

The Airstream™ is our big-volume sleeping mat pump. It's based on our 20 litre Ultra-Sil™ Nano dry sack with an added valve plug and foot loop. Using the venturi effect means the Airstream™ can be inflated with a single breath. Two to three cycles from the Airstream™ are enough to fill our mats, meaning you're ready to go quickly, with minimal breath condensation in your mat, or dizziness from blowing the mat up. The Airstream™ can be used as a 20L dry sack, or as a vacuum bag to store your down sleeping bag.

- Inflates most sleeping mats in only two or three breaths
- Oval base design
- Fully seam sealed with seal-able valve plug
- Made from lightweight 15D Ultra-Sil™

15 D ULTRA-SIL™

### Repair Kit

The simple peel-and-stick Sea to Summit sleeping mat Repair Kit has been specially formulated for a failsafe bond to our air mat surface fabric.

- Four 3cm circular grey patches
- Four 4cm square grey patches
- Two replacement silicone one-way valve flaps

## NEW SLEEPING BAG RANGE

### Light, warm and adaptable

Whether you're looking for versatility in unpredictable conditions, technical performance at an ultra-light weight, or unrestricted freedom of movement, our new range of down and synthetic sleeping bags showcase intuitive design features for superior comfort and ease-of-use, wherever your adventures take you.

### Free-Flow™ Zip System

Our Free-Flow™ zip design ensures your sleeping bag retains maximum warmth and efficiency when needed and multiple ventilation options when it's not. The half zip on the right side of the bag (left side on women's bags) provides freedom of movement for both arms, additional ventilation and allows the top third of the bag to be folded down as a mini quilt when the mercury climbs higher than expected. A separate foot zip on some models provides extra ventilation and also transforms the bag into a full quilt.

### EN13537 Temperature Rating System

When choosing a sleeping bag by temperature range, it's important to consider that everyone sleeps differently: some people are very warm sleepers while others feel the cold easily. Many factors affect your warmth and comfort in a sleeping bag, particularly the use of a good insulating mat to prevent your body heat from being drawn into the cold ground. Your tent or shelter, gender and metabolism, clothing worn, use of a sleeping bag liner or hood and your daily calorie intake can also affect how your body responds to the cold.

The EN13537 is a European standard for sleeping bags that provides three temperature levels to help guide you when choosing a bag:

**Comfort** If you are female or consider yourself a cold sleeper, use this rating to decide the coldest temperature the sleeping bag is suitable for. We emphasize the Comfort temperature for our women's specific sleeping bags.

**Lower Limit** If you consider yourself a warm sleeper, use this rating to decide the coldest temperature the sleeping bag is suitable for. We emphasize the Lower Limit temperature for all our unisex sleeping bags.

### Zip Bags Together

Down and synthetic bags identified with our zip coupling symbol use a 165cm #5 YKK full-length zip which allows a unisex left-handed and women's specific right-handed bag to pair together. Designed to pair side by side, each person sleeps in their own bag enabling each of you to take advantage of your bag's unique insulation zones, hood and footbox features—perfect for cosy adventures for two. Bags with full-length #5 YKK zips on both sides can also be coupled together with other pairing bags.

ZIP COUPLING  
LH & RH BAGS ZIP TOGETHER

**Extreme** Between the lower limit and the extreme rating a strong sensation of cold must be expected and there is a risk of health damage due to hypothermia. This is an extreme survival rating only; we do not recommend you rely on this rating for normal use.

All Sea to Summit sleeping bags have been tested to the EN13537 standard. We recommend you use our EN13537 quoted ratings as a guide and a comparative reference to other EN13537 tested bags.

# NEW DOWN SLEEPING BAGS

With the introduction of water-repellent ULTRA-DRY Down™ we have virtually eliminated the negative effects moisture has on down. The ULTRA-DRY Down™ water-repellent treatment protects the down from external moisture and condensation from inside the bag.

A “Down Batch Test Report” from the International Down Feather Laboratory (IDFL) is enclosed to certify the superior loft of the down used in our sleeping bags. The IDFL is the largest and most respected down and feather laboratory in the world.

## Responsible Down Standard (RDS)

The RDS is helping to shift the entire down and feather industry towards more humane animal rearing and handling practices. Overseen by the industry leading Textile Exchange, the RDS requires independent, third party assessments of all aspects of animal rearing and handling throughout the entire supply chain. By only using down that meets the audited requirements of the RDS we can have confidence that each phase of the collection process has been completed with the welfare and ethical treatment of waterfowl in mind. To find out more about how the RDS is improving animal welfare during down collection, please visit [responsibledown.org](http://responsibledown.org)

# Alpine Ap

ULTRA-DRY Down™  
850+ Loft

## Our first choice for extreme cold and high altitude conditions where sleeping well can make or break an expedition

Our Alpine™ Series combines our most technical sleeping bag features to deliver reliable performance while cocooning you in the highest quality RDS 850+ Loft Goose ULTRA-DRY Down™.

Designed for high altitude mountaineering and arctic conditions, the contoured mummy design delivers efficient insulation, while our updated expedition sizing provides space for extra clothing to be worn inside the bag. The anatomically shaped and oversized footbox can comfortably accommodate boots when necessary.

Vertical baffles over the chest section ensure the down insulation cannot migrate or shift to the outside of the bag during sleep, creating cold spots. A side block baffle construction maintains the 60/40 fill ratio, keeping more down on the top of the bag for maximum insulation.

Our ULTRA-DRY Down™ water-repellent treatment protects the down from external moisture and condensation from the inside of the bag, virtually eliminating the negative effects moisture has on down. All Sea to Summit Down Sleeping Bags use Responsible Down Standard (RDS) certified down.

The Free-Flow Zip system provides a half zip on the right side of the bag to provide freedom of movement for both arms as well as additional ventilation. The full length, two-way left side zip provides easy access and extra ventilation options.

Our waterproof yet breathable NanoShell™ fabric provides protection from wind and moisture. The tightly sized and carefully panelled hood fits snugly around your head, allowing you to maintain maximum warmth with minimal adjustment.

An oversized zipper draft tube is fitted with the lightest and stiffest anti-sag materials for effortless operation and to prevent heat loss through the zipper.

- Designed for extreme cold and high-altitude conditions
- Contoured mummy shape for efficient insulation
- Expedition sizing for extra space and layered clothing
- Vertical chest baffles prevent down migration and cold spots
- Side block baffle with 60/40 fill ratio keeps more down on the top of the bag for maximum insulation
- Anatomically shaped and oversized footbox can accommodate boots
- Free-Flow half right-side zip for freedom of movement and additional ventilation
- RDS 850+ Loft Premium Goose ULTRA-DRY Down™ for maximum insulation value
- Our waterproof/breathable NanoShell™ fabric protects against wind and moisture
- Snug panelled hood maintains maximum warmth with minimal adjustment
- Oversized draft tube with anti-sag materials, prevents heat loss through zipper
- Oversized neck draft tube with a dual adjustment system for even cinching and maximum warmth
- YKK #5 side zip has two sliders for easy access and extra ventilation
- Large internal security pocket
- Includes lightweight Ultra-Sil™ compression bag for compact storage
- NOTE: This bag is not designed to pair with another

## When you need a high performance sleeping bag but don't want to be weighed down by one, our Spark™ Series Bags are what you reach for

Ultra-light and technical, our Spark™ Series bags are designed to keep you as warm as possible while minimising packed weight and size.

The Spark™ Series spans everything from an ultralight liner to an expedition weight mid-winter bag. While the end usage is very different, they reflect a design ethos of matching weather conditions to the lightest bag possible.

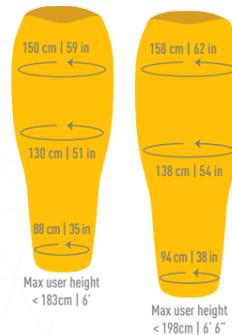

The secret to the impressive performance is a combination of premium materials and careful design. The RDS 850+ Loft premium goose down, light-gauge #3 YKK zip and high performance 10D Nylon shell and 7D lining fabrics, set the stage for superior performance. These materials are combined with a contoured mummy design for efficient insulation, and that mummy design is then tweaked for each model to best fit the use scenario.

Our ULTRA-DRY Down™ water-repellent treatment protects the down from external moisture and condensation from the inside of the bag, virtually eliminating the negative effects moisture has on down. All Sea to Summit Down Sleeping Bags use Responsible Down Standard (RDS) certified down. The ULTRA-DRY Down™ protection also makes the Spark™ an impressive hard-alpine or adventure racing bag, where every gram is counted and down has never been a viable option.

- Ultralight 7D and 10D fabrics for minimal weight and packed size
- RDS 850+ Loft Premium Goose ULTRA-DRY Down™ for maximum insulation value
- Contoured mummy shape for comfort and efficient insulation
- Vertical chest baffles prevent down migration and cold spots
- NOTE: This bag is not designed to pair with another

## Engineered for women to provide extra warmth where needed, our Flame™ is what you reach for when you need a high performance sleeping bag but don't want to be weighed down by one

Ultra-light and technical, our Flame™ Series bags are designed to keep you as warm as possible while minimising packed weight and size.

The Flame™ Series spans everything from an ultralight liner to an expedition weight mid-winter bag. While the end usage is very different, they reflect a design ethos of matching weather conditions to the lightest bag possible.

The secret to the impressive performance is a combination of premium materials and careful design. The RDS 850+ Loft premium goose down, light-gauge #3 YKK zip and high performance 10D Nylon shell and 7D lining fabrics set the stage for superior performance. These materials are combined with a contoured mummy design for efficient insulation, and that mummy design is then tweaked for each model to best fit the use scenario.

The women's specific fit is wider at the hip and narrower at the shoulder and we've added extra down overall for increased warmth.

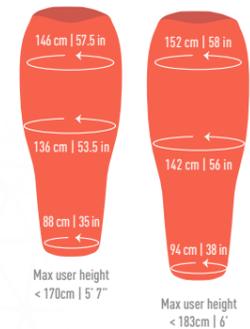

Our ULTRA-DRY Down™ water-repellent treatment protects the

down from external moisture and condensation from the inside of the bag, virtually eliminating the negative effects moisture has on down. All Sea to Summit Down Sleeping Bags use Responsible Down Standard (RDS) certified down. The ULTRA-DRY Down™ protection also makes the Flame™ an impressive hard-alpine or adventure racing bag, where every gram is counted and down has never been a viable option.

- Women's specific contoured mummy shape for efficient insulation
- Ultralight 7D and 10D fabrics for minimal weight and packed size
- RDS 850+ Loft Premium Goose ULTRA-DRY Down™ for maximum insulation value
- Vertical chest baffles prevent down migration and cold spots

# Ember Eb

## Ditch the zipper and head into the hills with our lightweight and versatile Ember™ Quilt

Super lofty 850+ down, ultra-light 7D and 10D fabrics and a bit more shoulder room, our Ember™ Quilts are loved by through-hikers, cycle tourers and anyone looking for unadulterated plush warmth in a tiny compressed size.

For backcountry enthusiasts not so enthusiastic about a restrictive sleeping bag, our Ember™ quilts' multiple configurations provide versatility for a wide range of temperatures and environments.

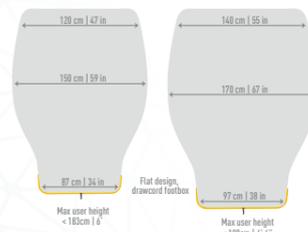

When the thermostat climbs, treat your Ember™ like a traditional quilt and allow your feet and arms freedom to cool you down. When the temperature drops, a draw cord can be cinched tight to create a foot pocket and a strap and press-stud system used to secure your mat to the quilt, keeping heat loss to a minimum.

To reduce weight and keep packed size to the absolute minimum, we've used our lightest down proof 10D shell and 7D lining fabrics and upgraded the insulation to our 850+ Loft Premium Goose ULTRA-DRY Down™. Not only is this down super warm and compressible, it works to prevent moisture and inclement weather having a negative effect on the loft of the quilt.

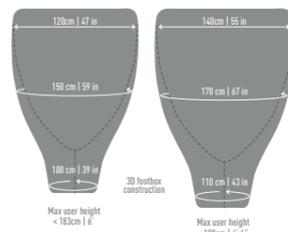

Available in three models, each in two sizes, our Ember™ quilts are perfect for your next fast and light adventure

- Ultra-light 10D shell and 7D lining for minimal weight and packed size
- Super-compressible RDS 850+ Loft Premium Goose ULTRA-DRY Down™ for maximum insulation value
- Increased sizing a little more 'wrapping' capability in wintry conditions
- Multiple configurations for versatility for a wide range of temperatures and environments
- Two Embers™ can press stud together to make a double quilt
- Versatile system to secure quilt to your mat, keeping heat loss to a minimum when warmth is needed
- EbI uses sewn through quilted construction for a lighter and more compact quilt
- EbII and EbIII use box baffles throughout, with vertical baffles strategically placed on chest section to keep down in place during the night
- EbIII has a sewn in footbox to retain maximum warmth in colder conditions
- NOTE: This bag can only pair with another Ember

ULTRA-DRY Down™  
850+ Loft

# Ascent Ac

ULTRA-DRY Down™  
750+ Loft

## Be prepared for the unpredictable with our adaptable Ascent™ Series bags

Light, warm, comfortable and most importantly, adaptable. The Ascent™ is our sleeping bag of choice for most adventures, most of the time. Offering the perfect backpacking balance of comfort vs weight, our Ascent™ Series sleeping bags have more space than traditional mummy bags, yet still provide the thermal efficiency you need when exploring above the tree-line.

The Free-Flow triple-zip design ensures your sleeping bag retains maximum warmth and efficiency when needed and multiple ventilation options when it's not. The half zip on the right side of the bag provides freedom of movement for both arms, additional ventilation and means the top third of the bag can be folded down as a mini quilt. The full length, two-way left side zip and separate foot zip transforms the bag into a full quilt for when the mercury climbs higher than expected.

If it's warmth you're after, close all the zips, pull the cord locks tight to drag everything in, and relax in luxurious comfort. The generous allocation of high quality 750+ Loft down ensures great insulation, while the oversized draft tubes prevents your body heat escaping. The panelled footbox and 3-dimensional hood make sure you're not compressing the down when you're trying to stay warm.

Vertical baffles over the chest section ensure the down insulation cannot migrate or shift to the outside of the bag during sleep, creating cold spots. A side block baffle construction maintains the 60/40 fill ratio, keeping more down on the top of the bag for maximum insulation.

- Tapered rectangular shape for perfect balance of space and adaptable warmth
- Super-light 20D Nylon shell and lining fabrics for minimal packed size and maximum breathability
- RDS 750+ Loft ULTRA-DRY Down™ for superior insulating power
- Vertical chest baffles prevent down migration and cold spots
- Free-Flow half right side, full length two-way #5 YKK left side and separate foot zips for freedom of movement, increased ventilation and dual-use as a quilt
- Oversized draft tube with anti-sag materials, prevents heat loss through zipper
- Oversized neck draft tube with a dual adjustment system for even cinching and maximum warmth
- Generously sized hood and dual cord adjustment for maximum warmth retention
- Anatomically shaped footbox allows maximum down lofting, minimising heat loss from your feet
- Large internal security pocket
- Includes Ultra-Sil™ Compression Bag for compact storage
- Zip Coupling: This bag is designed to pair with another

# ♀ Altitude At

ULTRA-DRY Down™  
750+ Loft

## Engineered for women to provide extra warmth where needed, be prepared for the unpredictable with our adaptable Altitude™ Series bags

Offering the perfect backpacking balance of comfort vs weight, our Altitude™ Series sleeping bags have more space than traditional mummy bags, yet still provide the thermal efficiency you need when exploring above the tree-line.

The Free-Flow triple-zip design ensures your sleeping bag retains maximum warmth and efficiency when needed and multiple ventilation options when it's not. The half zip on the left side of the bag provides freedom of movement for both arms, additional ventilation and also means the top third of the bag can be folded down as a mini quilt. The full length, two-way right side zip and separate foot zip transforms the bag into a full quilt for when the mercury climbs higher than expected.

If it's warmth you're after, close all the zips, pull the cord locks tight to drag everything in, and relax in luxurious comfort. The generous allocation of high quality 750+ Loft down ensures great insulation, while the oversized draft tubes prevents your body heat escaping. The panelled footbox and 3-dimensional hood make sure you're not compressing the down when you're trying to stay warm. The Altitude™ also features extra down overall and THERMOLITE® panels under the foot area, to help keep heels and ankles warmer.

Vertical baffles over the chest section ensure the down insulation cannot migrate or shift to the outside of the bag during sleep, creating cold spots. A side block baffle construction maintains the 60/40 fill ratio, keeping more down on the top of the bag for maximum insulation.

Our tapered rectangular design gives you additional wriggle room inside the bag, perfect for a side or restless sleeper and an alternative if you find a traditional mummy shape too constricting. The women's specific fit is wider at the hip and narrower at the shoulder and comes in two lengths.

- Women's specific tapered rectangular shape for perfect balance of space and adaptable warmth
- Extra down overall and THERMOLITE® panels under the foot area for additional warmth
- Super-light 20D Nylon shell and lining fabrics for minimal packed size and maximum breathability
- RDS 750+ Loft ULTRA-DRY Down™ for superior insulating power
- Vertical chest baffles prevent down migration and cold spots
- Free-Flow half left side, full length 2 way #5 YKK right side and separate foot zips for freedom of movement, increased ventilation and dual-use as a quilt
- Oversized draft tube with anti-snap materials, prevents heat loss through zipper
- Oversized neck draft tube with a dual adjustment system for even cinching and maximum warmth
- Generously sized hood and dual cord adjustment for maximum warmth retention
- Anatomically shaped footbox allows maximum down lofting, minimising heat loss from your feet
- Large internal security pocket
- Includes Ultra-Sil™ Compression Bag for compact storage
- Zip Coupling: This bag is designed to pair with another

# Explore Ex

ULTRA-DRY Down™  
750+ Loft

## Comfort and versatility for long trips when shaving weight is not your highest priority

Designed for those of us who love space, versatility and plush comfort, the Explore™ is ideal for outdoor adventures that return to the same camp site each evening, for car camping road trips, crag-hopping van life or hut-based expeditions.

Its spacious contoured rectangular shape, with an ultra-wide circumference, is ideal if you love freedom of movement and hate that tight sleeping bag feeling. And no matter which way the weather turns, the Explore™ can be modified to suit. Zip yourself in and pull the internal drawcords tight to combat the cold. When the temperature heats up, the multiple-zips allow you to poke your toes out if you need a little fresh air or separate the top from the bottom of the bag and use it as a standalone quilt.

Vertical baffles over the chest section ensure the down insulation cannot migrate or shift to the outside of the bag during sleep, creating cold spots. A side block baffle construction maintains the 60/40 fill ratio, keeping more down on the top of the bag for maximum insulation.

The generous allocation of high quality 750+ Loft down ensures great insulation, while the oversized draft tubes prevents your body heat escaping. The panelled footbox and 3-dimensional hood make sure you're not compressing the down when you're trying to stay warm.

Designed to integrate with all our sleeping mats and to create the ultimate in sleep system comfort, the Explore™ utilises simple removable adjustable webbing loops to connect your mat to your bag.

# Traveller Tr

ULTRA-DRY Down™  
750+ Loft

## Small and light yet warm and lofty 750+ down, the Traveller™ is your couch-surfing comrade

The ultimate choice for your Camino pilgrimage, round-the-world adventure or keeping warm on a plane, the Traveller™ provides adaptable warmth in a tiny packed size.

Ultra-light 15D Nylon fabrics and 750+ ULTRA-DRY Down™ combine to minimise weight and packed size while providing lofty warmth that resists the insulation sapping effects of moisture.

Shoulder and foot drawcords cinch the bag tight to retain maximum warmth when needed and allow for streamlined simplicity in cooler climes.

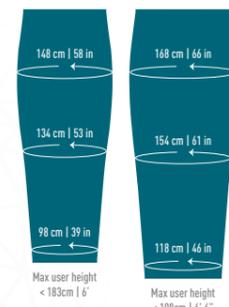

It's slightly tapered shape is sized as a comfortable solo sleeping bag that unzips into a spacious quilt to share. Zip two together and you have a duo bag for when you're not travelling alone.

It's small packed size makes it perfect for stashing in your car for unplanned bivies, the Traveller™ also works well as a top quilt to significantly increase the warmth of another sleeping bag.

- Slightly tapered shape for a comfortable solo sleeping bag, and unzips into a spacious quilt
- Ultra-light 15D Nylon fabrics to minimise weight and bulk
- RDS 750+ Loft ULTRA-DRY Down™ for superior insulating power and compressibility
- Shoulder and foot drawcords cinch the bag tight to retain maximum warmth
- Zip two Travellers™ together for adventuring couples
- Doubles as a top quilt to significantly extend the warmth of another sleeping bag
- TrI uses a sewn through quilted construction to achieve minimal weight
- TrII uses full horizontal baffles and additional down fill for extra warmth
- Includes lightweight Ultra-Sil™ Compression sack for maximum compression when travelling
- NOTE: This bag can only pair with another Traveller

# Trek Tk

ULTRA-DRY Down™  
650+ Loft

## Comfort, versatility and value in a classic tapered rectangular down bag

Traditional comfort and value, with an anything but traditional design approach, our Trek™ Series sleeping bags are what we grab for globe-trotting adventures on a budget.

Vertical baffles over the chest section ensure the down insulation cannot migrate or shift to the outside of the bag during sleep, creating cold spots. A side block baffle construction maintains the 60/40 fill ratio, keeping more down on the top of the bag for maximum insulation.

Lightweight fabrics reduce weight and packed bulk while the two-way #5 YKK full length side zip and separate foot zip, allows the bag to open out completely and double as a quilt. The foot zip is perfect for extra ventilation or to provide freedom of movement for your feet.

The 3D side-wall baffle ensures that down can loft to the very edge of the bag, maximising insulation, while the panelled hood draws in tight when needed or lies flat for use in warmer weather. The oversized zipper draft tube uses anti-snag materials to prevent the zipper catching and the soft-touch 20D lining fabric is highly breathable yet also down proof.

Completing the thoughtful design features of this classic down bag, we have included a large internal security pocket, perfect for keeping valuables close or batteries warm.

- Tapered rectangular for more space and comfort than a traditional mummy bag
- RDS 650+ Loft ULTRA-DRY Down™ offers excellent insulation and compressibility
- Lightweight fabrics for reduced weight and bulk
- Vertical chest baffles prevent down migration and cold spots
- Two-way #5 YKK side and separate foot zip allows bag to double as a quilt and provides extra ventilation options
- Oversized zip draft tube with anti-snag materials
- Large internal security pocket
- 3D side-wall baffle maximises down insulation right to the edge of the bag
- 3D hood draws in tight when needed
- Trek Tk3 has additional neck collar draft tube to seal and trap in all your warmth
- Soft touch 20D lining fabric is lightweight and highly breathable, durable 30D Nylon shell
- Includes Ultra-Sil™ Compression Bag for compact storage
- Zip Coupling: This bag is designed to pair with another

# ♀ Journey Jo

ULTRA-DRY Down™  
650+ Loft

## Engineered for women to provide extra warmth where needed in a classic tapered rectangular down bag for comfort, versatility and value

Traditional comfort and value, with an anything but traditional design approach, our Journey™ Series sleeping bags are what we grab for globe-trotting adventures on a budget.

Whether you're sleeping in hostels throughout Europe, backpacking South America or hut camping the Bibbulmun Track in Western Australia, our Journey™ bag's classic tapered rectangular shape combined with 650+ Loft ULTRA-DRY Down™ provides compressible comfort and warmth. The Journey™ also features extra down overall, THERMOLITE® panels under the foot area to help keep heels and ankles warmer, and a women's specific cut that is wider at the hip and narrower at the shoulder.

Vertical baffles over the chest section ensure the down insulation cannot migrate or shift to the outside of the bag during sleep, creating cold spots. A side block baffle construction maintains the 60/40 fill ratio, keeping more down on the top of the bag for maximum insulation.

Lightweight fabrics reduce weight and packed bulk while the two-way #5 YKK full length side zip and separate foot zip, allows the bag to open out completely and double as a quilt. The foot zip is perfect for extra ventilation or to provide freedom of movement for your feet.

The 3D side-wall baffle ensures that down can loft to the very edge of the bag, maximising insulation, while the panelled hood draws in tight when needed or lies flat for use in warmer weather. # Treeline TL

600+ Loft

## Simple and durable, yet refined, your perfect companion for uncomplicated summer adventures

Our Treeline™ Sleeping Bag is a budget down bag that is ideal for three season use when you're confident the temperature won't drop below freezing.

While we've given this design a little extra room around the shoulders and hips for freedom of movement, the relaxed mummy shape still provides efficient warmth and heat retention when you need it.

Filled with 400g of compressible and lofty 600+ down, the Treeline™ will keep you warm and comfortable. The two-way YKK #5 side zip with anti-snap fabric provides easy access and ventilation for warmer weather.

Utilising our unique internal cord tunnel in the hood and neck draft tube, the Treeline™'s exterior finish is kept neat and free of additional loose fabric. The internal chest pocket is a great spot for keeping valuables secure, or batteries warm.

The 50D Nylon shell and lining fabrics provide long-term durability while still offering good compressibility.

Light enough for backpacking adventures, this sleeping bag can withstand the rigours of sharing your outdoor adventures with kids or dogs.

- Relaxed mummy shape with fitted hood for a little more wriggle space while still providing efficient warmth
- Super-compressible and lofty RDS 600+ Down
- 50D Nylon shell and lining fabric provide extra durability while still offering good compressibility
- Internal chest pocket is perfect for keeping valuables secure, or batteries warm
- Draft tube prevents heat loss through the zipper
- Internal draw cords in the hood and neck draft tube for streamlined exterior finish
- Two-way YKK #5 side zip with anti-snap system for easy access and ventilation options
- Supplied with stuff sack and storage cell
- Zip Coupling: This bag is designed to pair with another

# NEW SYNTHETIC SLEEPING BAGS

Our unique WaveLoft™ construction uses thick layers of synthetic insulation looped together to gain extra loft and trap pockets of warm air, providing increased warmth in colder conditions. The baffle construction also eliminates the frustration of getting tangled in loose lining as all lining fabrics are attached to the shell fabric.

**THERMOLITE®**

Synthetic insulation

# Basecamp Bc

## Ultra-spacious with multiple ventilation configurations, our Basecamp™ is pure outdoor luxury!

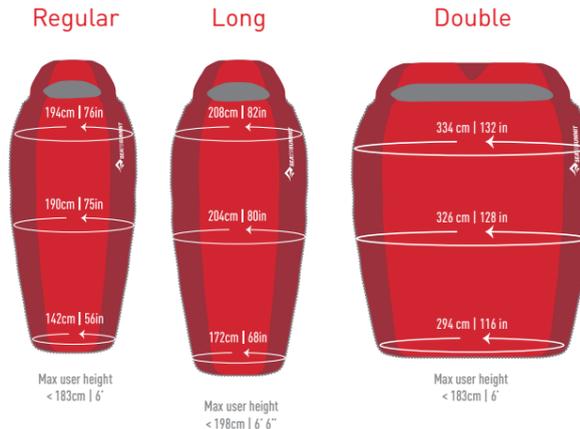

Our most versatile and spacious sleeping bag, the Basecamp™ provides unrestricted movement and integration with your mat so you can enjoy a little more stretch out comfort while escaping outdoors.

Three two-way zips provide ultimate ventilation and temperature control and allow the top and bottom layers to be separated, with the top becoming a standalone quilt for warmer conditions.

Our unique WaveLoft™ construction uses thick layers of THERMOLITE® insulation looped together to gain extra loft and trap pockets of warm air, providing increased warmth in colder conditions. The baffle construction also eliminates the frustration of getting tangled in loose lining as all lining fabrics are attached to the shell fabric.

Perfect for sleepers who like to stretch out full length or curl up into a ball, the Basecamp™ provides versatile comfort for gear drops, car camping and day trips from base camp.

- Spacious contoured rectangular shape
- Three two-way zips for ventilation and climate control
- Multi zip configuration provides versatility
- THERMOLITE® insulation using WaveLoft™ construction for extra warmth and loft
- Lining fabrics attached to shell prevents tangles
- Elastic loops connect sleeping bag to mat
- Now available in a Double size for camping couples
- Proprietary blend of THERMOLITE® insulation using soft microfibres and fine denier hollow-core fibres for lightweight warmth and softness, with high loft and superior compressibility
- Oversized anti-snap zip draft tubes and neck draft tube
- 30D DWR Nylon shell and 20D Nylon lining are lightweight and very compressible fabrics
- Includes strong 70D compression sack
- Zip Coupling: This bag is designed to pair with another

# Traverse Tv

## A robust and technical synthetic bag, our Traverse™ provides versatility to stay comfortable in most conditions

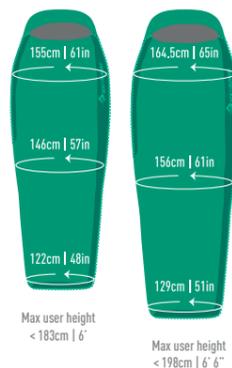

Whether you hike through snow to sleep in an alpine hut or camp out after a summer storm, the Traverse™ won't let you down.

Our unique WaveLoft™ construction uses thick layers of THERMOLITE® insulation looped together to gain extra loft and trap pockets of warm air, providing increased warmth in colder conditions. The baffle construction also eliminates the frustration of getting tangled in loose lining as all lining fabrics are attached to the shell fabric.

The Free-Flow triple-zip design ensures your sleeping bag retains maximum warmth and efficiency when needed and multiple ventilation options when it's not. The half zip on the right side of the bag provides freedom of movement for both arms, additional ventilation and means the top third of the bag can be folded down as a mini quilt. The full length, two-way left side zip and separate foot zip transforms the bag into a full quilt for when the mercury climbs higher than expected.

- Tapered rectangular shape for more space and comfort than a traditional mummy bag
- Free-Flow half right side, full length left side and separate foot zips for freedom of movement and increased ventilation
- THERMOLITE® insulation using WaveLoft™ construction for extra warmth and loft
- Lining fabrics attached to shell prevents tangles
- Proprietary blend of THERMOLITE® insulation using soft microfibres and fine denier hollow-core fibres for lightweight warmth and softness, with high loft and superior compressibility
- Anatomically shaped footbox for extra space
- Oversized anti-snap zip draft tubes and neck draft tube
- 30D DWR Nylon shell and 20D Nylon lining are lightweight and very compressible fabrics
- Includes strong 70D compression sack

# AEROS™ PILLOWS

Whether in transit or the back country, our Aeros™ range of lightweight and compact inflatable pillows will award you a comfortable sleep.

## AEROS™ PREMIUM DELUXE PILLOW

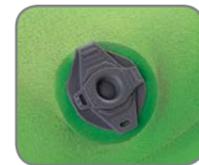

The Aeros™ Premium Deluxe Pillow is a result of the Sea to Summit Design Team taking the adage of 'bigger is better' to heart. The result of our super-sizing project is a full sized pillow that is still light and compact enough to accompany you into the backcountry. The pillow case construction uses a super soft 50D quilted polyester for comfort, while still being supported by a high strength TPU bladder.

- Super sized for bedroom comfort outside
- Brushed 50D polyester stretch knit face fabric for soft hand feel
- High strength TPU bladder
- Featuring our patent pending mini-valve for easy inflate, deflate and fine tuning

Code	Packed Size	Dimensions	Weight
APILPREMDLX	12 x 11 x 5.5cm	56 x 36 x 14cm	195g

The low profile patent pending valve minimises weight by combining all functions into one unit.

Inflate pillow through one-way valve in only a couple of breaths and adjust by pressing release button.

The low profile patent pending valve minimises weight by combining all functions into one unit.

## AEROS™ PREMIUM PILLOW

A luxurious high performance pillow without the weight and bulk. Perfect for travel and camping where you can risk a couple more grams for a great night's sleep. The pillow case construction allows the outer shell to retain maximum softness while still being supported by a high strength TPU bladder.

- Brushed 50D polyester stretch knit face fabric for soft hand feel
- Synthetic fill between pillow case and TPU bladder increases comfort and wicks away perspiration
- Curved internal baffles create contours that cradle your head
- Scalloped bottom edge centres pillow over your shoulders whether you are sleeping on your back, side or upright in a chair
- Featuring our patent pending mini-valve for easy inflate, deflate and fine tuning

Code	Size	Packed Size	Dimensions	Weight
APILPREMRG	Regular	ø7 x 8.5cm	34 x 24 x 11cm	79g
APILPREMLG	Large	ø8 x 10.5cm	42 x 30 x 13cm	114g

## AEROS™ PREMIUM TRAVELLER PILLOW

The Aeros™ Premium includes an adjustable neck closure to support the entire circumference of your neck, providing a more comfortable sleep.

The closure is made from welded 20D knit fabric which offers stretch and softness without requiring bulky edge binding. Three press studs are applied to the fabric offering two lengths to choose from.

The Aeros™ Premium Traveller Pillow closure is stitched into the soft and stretchy 50D face fabric.

- Adjustable neck closure for additional support
- Soft, stretchy materials
- Exceptionally compact and packable
- Ergonomic shape and enlarged ends reduce the need to bend your neck for support
- Narrows at the centre to fit snugly between your neck and headrest
- Packs flat into a compact stuff sack for easy travel
- Low profile multi-function mini-valve for fast inflation and adjustment

Code	Packed Size	Dimensions	Weight
APILPREMYHA	9 x 7.5 x 4.5cm	48 x 29 x 12cm	75g

## AEROS™ ULTRALIGHT DELUXE PILLOW

The same super-sizing project that created the Aeros™ Premium Deluxe also produced an ultra-light version of the same dimensions.

The Aeros Ultralight Deluxe Pillow has been designed using a variation of our patented Air Sprung Cell™ technology. This has allowed us to create a larger single layer air pillow that doesn't feel like a balloon when you're at rest.

For a paltry 130 grams you can now take a full sized pillow on your outdoor adventures.

- Made from 20D laminated polyester for minimal packed size and weight
- Curved internal baffles create contours that cradle your head
- Scalloped bottom edge centres pillow over your shoulders whether you're sleeping on your back, side or upright in a chair
- Durable High Frequency welded construction
- Inflate pillow in a couple of breaths with our new patent pending mini multi-function valve
- Stretch knit fabric creates a more comfortable user experience

Code	Packed Size	Dimensions	Weight
APILULDLX	12 x 10 x 3cm	56 x 36 x 14cm	130g

## AEROS™ ULTRALIGHT PILLOW

The Aeros™ Ultralight Pillow epitomises our design preferences for 'light, compact and comfortable'. The result is a 20D laminated polyester pillow with shapely support that can be packed away into a neat, small stuff sack.

From the aeroplane to the mountains the, Ultralight is the perfect travel companion for those on the move.

- Made from 20D laminated polyester for minimal packed size and weight
- Curved internal baffles create contours that cradle your head
- Scalloped bottom edge centres pillow over your shoulders whether you're sleeping on your back, side or upright in a chair
- Durable High Frequency welded construction
- Inflate pillow in a couple of breaths with our new patent pending mini multi-function valve
- Stretch knit fabric creates a more comfortable user experience

Code	Size	Packed Size	Dimensions	Weight

APILULLG	Large	ø5.5 x 8.5cm	44 x 32 x 14cm	70g

## AEROS™ ULTRALIGHT TRAVELLER PILLOW

The Ultralight Traveller Pillows includes an adjustable neck closure to support the entire circumference of your neck, providing a more comfortable sleep.

The closure is made from welded 20D knit fabric which offers stretch and softness without requiring bulky edge binding. Three press studs are applied to the fabric offering two lengths to choose from.

The Aeros™ Ultralight Traveller Pillow closure runs directly from the perimeter weld.

- Adjustable neck closure for additional support
- Soft, stretchy materials
- Exceptionally compact and packable
- Ergonomic shape and enlarged ends reduce the need to bend your neck for support
- Narrows at the centre to fit snugly between your neck and headrest
- Packs flat into a compact stuff sack for easy travel
- Low profile multi-function mini-valve for fast inflation and adjustment

Code	Packed Size	Dimensions	Weight
APILULYHA	ø5 x 7.5cm	48 x 29 x 12cm	50g

# AEROS™ DOWN PILLOWS

Combines the ultralight and super compact nature of our Aeros™ Pillows with the comfort and warmth of down

By using ultralight materials to construct a down cushion-top over a TPU air bladder, our Aeros™ Down Pillow is the lightest fully-featured down pillow on the market.

Light, warm and comfortable, the premium down cushion-top is made from the same exceptionally light and transparent 10D fabric used in our Spark™ sleeping bags.

Differentially cut horizontal baffles reduce down migration and prevent the down compressing, even when the air bladder is fully inflated. The cushion-top wraps over the front of the pillow for neck comfort. The rest of the pillow case is made from lightweight 20D fabric.

Our Aeros™ bladders use a unique long-lasting anti-hydrolysis TPU film which prevents material breakdown from moisture exposure. Extremely light, the bladder's horizontal baffles create a 3D surface that cradles the head for additional support. The multi-function mini-valve provides easy inflation, deflation and fine tuning.

- Premium down cushion-top for comfort and warmth
- Ultralight and high-strength TPU bladder
- Differentially cut baffles allow maximum down loft
- Technical fabrics for lightweight performance
- Multi-function mini-valve for easy inflate, deflate and fine tuning
- Store and transport in compact 20D stuff sack
- Care instructions: close valve, gently hand wash and air dry

# AEROS™ PILLOW CASE

Adventure is a dirty business. Keep your pillow clean.

Pillow Case on Aeros™ Ultralight Pillow

Pillow Case on Aeros™ Traveller Pillow

Aeros™ Pillow Cases go over the top of our Aeros™ Pillows for easy washing or for use with spare clothes or a down jacket as a minimalist pillow alternative.

While all our pillows can be machine washed with the valve closed, some of us still prefer a more traditional solution. The Aeros™ Pillow Case can be slipped over our Aeros™ Pillows through the 20cm hidden zip, then quickly and easily removed for washing.

To prevent slippage during the night, the Aeros™ Pillow Case's base fabric is compatible with the hook-and-loop fastener patches that have come standard with all Sea to Summit Sleeping Mats from mid-2019. Current Aeros™ Pillows can be placed inside the Aeros™ Pillow Case for seamless integration with this new feature.

- Quick and easy removal for washing
- Remove air bladder through 20cm hidden zip
- Pack spare clothes inside for minimalist pillow
- Upgrade current Aeros™ Pillow to attach to mat
- Update current Aeros™ Traveller Pillow to include neck closure

# FOAM CORE PILLOWS

Compact comfort for the outdoors, our Foam Core Pillow offers the traditional feel of your favourite pillow at home

By using up-cycled foam off-cuts from our Self Inflating Sleeping Mats, our new Foam Core Pillow reduces waste.

The soft and stretchy 50D knit face fabric provides a better next to skin feel, while a layer of polyester fibre sheeting beneath gives extra cushioning and also wicks moisture.

To prevent slippage during the night, the Foam Core pillow's base fabric is compatible with the hook-and-loop fastener patches that have come standard with all Sea to Summit Sleeping Mats from mid-2019.

Firmly stuffed with low density foam with high rebound power for fast expansion, our Foam Core Pillow is compressed and stored with a simple hook-and-loop fastener. Eliminating the need for an extra stuff sack, this system compresses the pillow to 17% of its original size.

Styled to perform just like your favourite pillow at home, our Foam Core Pillow is the perfect compact camp pillow.

- Up-cycle off-cuts from our Self Inflating Mats
- Soft face fabric over cushioning fibre sheet for extra comfort
- Firmly stuffed to provide extra comfort and support
- Easy attachment to sleeping mat to prevent slippage
- Quickly compress and store with rolling closure
- Traditional shape for at-home comfort
- Care instructions: Machine wash and hang dry

# LINERS

## REACTOR™ SERIES

Sea to Summit Reactor™ Series sleeping bag liners are your best choice for adding warmth to your bag

THERMOLITE® is a hollow core fibre with fantastic insulating properties. When THERMOLITE® is made into a fabric it allows air to be trapped inside the actual fibre, as well as in the weave of the fabric, giving greater warmth for-the-weight of the liner than any other material that we use.

Our regular THERMOLITE® Reactor™ Liners use a knit, rather than a woven fabric, which offers a huge degree of integral stretch. This means that when you are inside your liner you can move around without feeling constricted or claustrophobic as the liner will stretch as you move in your sleep.

The Reactor™ Series comprises four different weights of THERMOLITE® fabric, giving you greater flexibility to extend the warmth of your sleeping bag.

### THERMOLITE® REACTOR™

Our most popular sleeping bag liner! The Reactor™ is made from 80g/m<sup>2</sup> THERMOLITE®— the lightest weight THERMOLITE® fabric available. THERMOLITE® is a hollow core fibre that provides amazing warmth for its weight and remains extremely breathable. The Reactor™ adds up to 8°C of warmth to your sleeping bag or can be used alone as a warm weather bag.

- Lighter weight, more packable than fleece
- Mummy shape with a box foot
- Drawcord hood with mini cord lock
- Extends life of sleeping bags by keeping them clean
- Contrasting colour along the top edge makes it easier to find the opening
- Packs into its own Ultra-Sil™ stuff sack

Code	Description	Extra Warmth	Weight
AREACTOR	Standard	Up to 8°C	248g

### THERMOLITE® REACTOR™ COMPACT PLUS

The THERMOLITE® Reactor™ Compact Plus can increase sleeping bag performance by up to 11°C with dual-weight THERMOLITE® fabric. Our regular 80g/m<sup>2</sup> is combined with panels of 110g/m<sup>2</sup> THERMOLITE® in the core body and footbox areas adding extra warmth, while the ergonomic design shaves off excess weight. Ideal for gram counters under six feet tall.

- First dual fabric sleeping bag liner
- 110g/m<sup>2</sup> THERMOLITE® panels in core body and foot areas for extra warmth
- Compact, shorter design is ideal for women and youth
- Extends life of sleeping bags by keeping them clean
- Contrasting colour along the top edge makes it easier to find the opening
- Packs into its own Ultra-Sil™ stuff sack

Code	Description	Extra Warmth	Weight
AREACTPL	Standard	Up to 11°C	263g

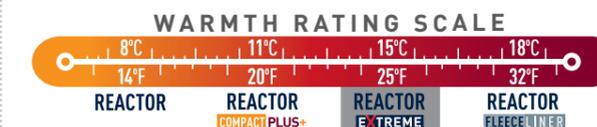

### THERMOLITE® REACTOR™ EXTREME

The THERMOLITE® Reactor™ Extreme uses our super insulating 110g/m<sup>2</sup> to seriously increase sleeping bag performance. The spacious design is slightly tapered from head to foot to reduce weight and increase thermal efficiency, and the drawcord hood can be cinched down for extra warmth when required. This knit fabric also has serious stretch to it, making the Reactor™ Extreme the ideal liner for the restless sleeper.

- Mummy shape with a box foot
- Drawcord hood with mini cord lock
- Extends life of sleeping bags by keeping them clean
- Contrasting colour along the top edge makes it easier to find the opening
- Packs into its own Ultra-Sil™ stuff sack
- Also available in a long version for the vertically blessed

Code	Description	Extra Warmth	Weight
AREACTEX	Standard	Up to 15°C	399g
AREACTEXLONG	Long	Up to 15°C	422g

### THERMOLITE® REACTOR™ FLEECE LINER

The THERMOLITE® Reactor™ Fleece Liner with hood is the warmest of our Reactor™ Series and can be used to extend the warmth of your sleeping bag or double as a stand alone summer bag. The THERMOLITE® Fleece is incredibly warm for its weight, and we have given this fabric a brushed finish for extra comfort. The quarter zip makes it easier to get in and out of, and panelled hood can be drawn in when maximum warmth is required.

- Smaller and warmer than other fleece liners
- Technical mummy shape with one handed, easy to operate draw string hood
- Quarter zip makes it easy to get in and out
- Can be used as a stand alone sleeping bag in warmer temperatures
- Contrasting colour along the top edge makes it easier to find the opening
- Packs into its own Ultra-Sil™ stuff sack

Code	Description	Colour	Weight
AREACTFLEECE	Standard	Grey	420g

## Premium FLEECE LINER

The Premium Fleece Liner is a great value option for adding additional warmth to your sleeping system. The toasty microfleece is soft and comfortable next to skin, and can be used as a lightweight sleeping bag in warmer climates or when sleeping indoors. It has a contoured hood with elastic drawcord and a three quarter zip to make it easy to get in and out of.

- Mummy shape with a box foot
- Comes in a Nylon stuff sack
- Contoured hood with elastic draw cord
- 3/4 length side zip

Code	Description	Length	Weight
AFLEECE	Mummy box foot	200cm	580g

## COOLMAX® ADAPTOR™

The COOLMAX® Adaptor™ is the most versatile model in our liner range. It provides a soft and luxurious finish, additional warmth when required in cooler conditions and efficiently wicks moisture in hot and humid conditions to provide a more comfortable sleep.

- Adapts to varied temperatures and humidity
- Versatile when used by itself or as part of a layered sleep system
- Wicks moisture for a more comfortable night's sleep
- Comfortable stretchy fabric
- Contrasting colour along top edge makes it easier to find the opening
- Keeps sleeping bag clean
- Machine washable and quick drying
- Packaged in its own Ultra-Sil™ stuff sack
- Available in both a standard and a traveller version

Code	Description	Weight
ACMAX	Standard	248g
ACMAXYHA	Traveller (with pillow insert)	328g

## Premium Stretch Knit EXPANDER™ LINER

The Expander™ liner is made from a premium stretch knit poly-cotton, making it super stretchy and even warmer than a standard cotton weave liner. The stretch properties allow the Expander™ to move with you as you sleep, vastly increasing comfort and minimising tangles. The anti-microbial treatment keeps bacteria at bay as well as prolonging the life of your liner and sleeping bag. The anti-microbial treatment won't wash out of the liner, and does not use nano-sized particles. The treatment is approved for use by the EPA (USA) and is used in many hospitals.

- Premium stretch knit fabric that can expand twice its width
- Luxuriously comfortable
- Extends life of sleeping bags by keeping them clean
- Anti-microbial protection, keeps your liner fresh, hygienic and odour free
- Easy care, machine washable

Code	Description	Dimensions	Weight

AEXPDBL	Double (Rectangular) †	160 x 185cm	620g

## 100% Premium SILK LINER

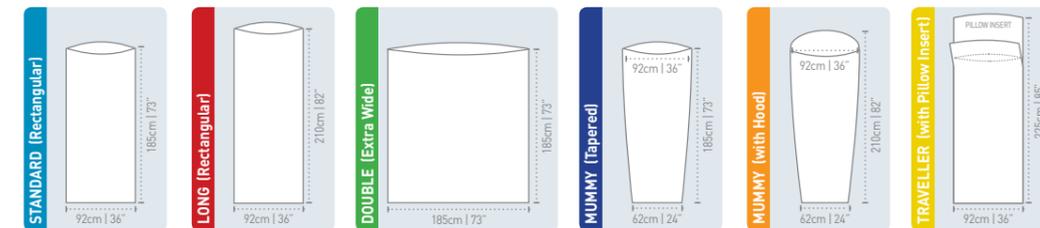

We make our Premium Silk Travel Liners from the finest ripstop silk and have added Polyester/Lycra stretch panels along the length of the seams. These stretch panels allow the liner to move with you when you turn, roll and curl up in the night.

- Premium AA Grade, ripstop silk
- Polyester/Lycra stretch gussets improve comfort and life of liner
- Increases thermal performance of sleeping bags
- Machine washable and colourfast
- Lightweight, super compact
- Double folded and reinforced seams
- Extends life of sleeping bags by keeping them clean

## Premium Blend SILK + COTTON LINER

Our lightweight Silk+Cotton Travel Liners are constructed from 100% natural fibres. With double folded and reinforced seams, our travel liners will improve your sleeping bag's thermal performance while cocooning you in luxurious comfort.

- Ideal as hygienic travel sheets
- Improves thermal performance of sleeping bags
- Lightweight, super compact
- Friendly to sensitive skin
- Double folded and reinforced seams
- Machine washable and colourfast
- Packaged in a zippered pouch with breathable mesh panel

Code	Description	Weight

AMUMMYOS	Mummy (Tapered)	325g
AHOOD	Mummy (with Hood)	370g
AYHAOS	Traveller (with Pillow Insert)	425g

## AIR CHAIR

UPDATED

Not only do Sea to Summit sleeping mats make comfortable beds, we also make an amazing recliner with the help of the Air Chair. Updated for improved durability and usability, our Air Chair comes in Large and Regular and is compatible with most mats in our range—including our extra thick (XT) air mats.

- Hybrid construction chair kit converts your Sea to Summit Sleeping Mat into a comfortable camp chair
- Reinforced pole sleeve with puncture-proof synthetic rubber caps for added strength
- Upgraded side release Field Repair Buckles with stainless-steel pin on side straps for durability and high break-strength
- Durable 70D base with 2000mm waterhead protects your mat from rough or wet ground
- Back panel and strap anchors sewn from high tenacity, abrasion-resistant fabric
- Minimalist lightweight design
- Elasticated gusset keeps mats protected from the side
- Regular Air Chair fits small and regular unisex Sea to Summit mats and regular and large women's mats
- Large Air Chair fits regular wide and large unisex Sea to Summit mats
- Not compatible with our Comfort Deluxe SI, Double or Campervan mats

Code	Description	Weight
AMAIRCR	Air Chair Regular	230 g
AMAIACL	Air Chair Large	280 g

## S.I. SEATS

### S.I. Seat

Our new S.I. Seat is the perfect compact companion adding 38mm of foam-filled comfort and support to any adventure. Whether providing much-needed cushioning for aching glutes during rest stops, compensating for cold and uncomfortable stadium seats or helping to alleviate the bouncing threadbare seats of a chicken bus in Central America, our S.I. Seats are a welcome addition to any pack.

- Made from robust and durable 75D polyester
- Features our patented mini-valve for optimal inflate, deflate and fine-tuning
- Thickness: 3.8cm
- Seat width x depth: 40 x 30cm

### S.I. Seat Deluxe

The Deluxe version of our S.I. Seat can be used as either a 50mm thick seat pad, or can be unfolded to offer additional back support and comfort when resting against a log or rock.

- Features our patented mini-valve for optimal inflate, deflate and fine-tuning
- A 30D stretch knit fabric on top. Robust and durable 75D polyester on base
- Thickness: 25mm seat and 25mm back section or 50mm if folded double as seat only
- Overall width x depth: 40 x 60cm (seat 40 x 30cm, back 40 x 30cm)

Code	Description	Packed Size	Dimensions	Weight
AMSIDS	S.I. Seat	Ø7.5 x 17cm	40 x 30 x 3.8cm	96g
AMSISD	S.I. Seat Deluxe	Ø9.5 x 22cm	40 x 60 x 2.5cm	180g

## AIR SEATS

Using the same technology as our award-winning Air Sprung Cell™ sleeping mats, our Air Seats are the perfect festival or sporting event companion. The sizing is generous and fits comfortably on typical stadium seating.

- Air Seat is made from a durable 75D Polyester top and base
- Air Seat Insulated is made from 30D Polyester on top and a durable 75D Polyester base and is filled with THERMOLITE® insulation
- Packs down into its own zippered pouch
- Features our patented mini-valve for optimal inflate, deflate and fine-tuning
- The Air Seats measure 30 x 40cm and 5cm thick when inflated

Super-fast inflate and deflate with multi-function low profile valve

THERMOLITE® to insulate against cold ground

AMAS	Air Seat	28 x 38cm	70g
AMASINS	Air Seat Insulated	28 x 38cm	80g

# HAMMOCK SETS

Sea to Summit Hammock Sets are technical, light and very compact. Delivered with everything required for a lazy afternoon hanging in the sun. Hammock Sets include suspension straps featuring a new quick connect buckle assembly.

Quick and easy-to-use set-up and adjust, they are great for recreational day-trippers relaxing in the outdoors and gram-saving adventurers sleeping out overnight.

## PRO HAMMOCK SET

Includes Pro Suspension Straps

The Pro Hammock reflects the high quality, technical drive behind Sea to Summit. We have analysed the products on the market and sought to improve every aspect: materials, construction, weight, bulk, and ease of use. Constructed from soft, ripstop Nylon with high strength, plated steel buckles and a CORDURA® Nylon compression bag. Designed to work seamlessly with the buckles of the Tree Protectors to create a simple, streamlined system.

FEATURED ON ALL HAMMOCK SET  
**SUSPENSION STRAPS:**  
New quick-connect buckle assembly for an even more secure operation.

## ULTRALIGHT HAMMOCK SET

Includes Ultralight Suspension Straps

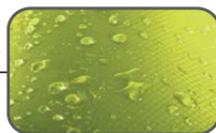

Our Ultralight Hammocks feature a custom made 20D Nylon monofilament fabric. Their whisper-light appearance is matched on the scales. Rated at 135kg the fabric is more than strong enough to take the load of a sleeping camper. Being a monofilament fabric, it is also highly compressible making for a minuscule packed size. The lightweight, high strength 6-series aluminium buckles are connected to the hammocks with 0.8mm Dyneema® non-stretch polyester blend webbing which is bar-tacked five times at each end for ultimate security.

Ultra-Sil® 30D siliconised, high-tenacity CORDURA® nylon for exceptional strength

Water resistant, durable storage

High strength steel buckle works with Suspension Straps

Webbing loop bar-tacked five times

Highly breathable fabric wicks moisture away

70D ripstop nylon for lightweight strength

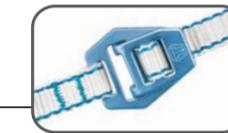

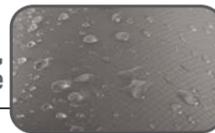

Code	Description	Dimensions	Weight

AHAMSETD	Double	3.0 x 1.9m	670g   23.6oz

Ultra-Sil® 30D siliconised, high-tenacity CORDURA® nylon for exceptional strength

Water resistant, durable storage

Aluminium buckle saves weight, works with Suspension Straps

Dyneema® blend webbing loop bar-tacked five times

Highly breathable fabric

20D monofilament Nylon for incredible strength to weight performance

Code	Size	Dimensions	Weight
AHAMSETULS	Single	2.6 x 1.2m	220g   7.7oz
AHAMSETULXLS	Single XL	3.0 x 1.5m	275g   9.7oz

## JUNGLE HAMMOCK SET

**NEW**

Our Jungle Hammock is breathable, insect-proof and keeps you off the ground, perfect for wet and humid conditions.

The Jungle Hammock is a lightweight and easy-to-use sleep set-up. Combine it with our Jungle Hammock Tarp for a sheltered, bug-free suspended sleep. The Jungle Hammock is constructed using breathable 70D ripstop Nylon, high-tenacity monofilament netting, corrosion-resistant anodised 6061 Aluminium buckles and Dyneema® webbing.

- Lightweight and easy-to-use quick-connect buckle system
- Durable and high-strength monofilament insect netting
- Dry and compact storage, in a highly effective compression sack

### Simple and effective set-up

Our improved design uses a single length of high-tenacity 15mm webbing which provides more versatility than in the typical 2-part suspension system.

Set-up is quick and provides easy adjustment and fine-tuning of the hammock for a comfortable sleep.

### Drip Guard

Stops rain running down webbing and saturating hammock body.

### Zip access

150cm zip access with two sliders and custom T-bars for ease of use.

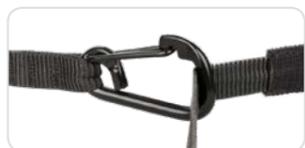

### Ridgeline pocket

Included on ridgeline for strong small items within reach.

### Insect protection

'No-see-um' grade monofilament Nylon-6 netting is lightweight without compromising durability.

### Secure attachment

Dyneema® suspension straps feature a webbing-protector and a stainless steel carabiner for quick and easy set-up.

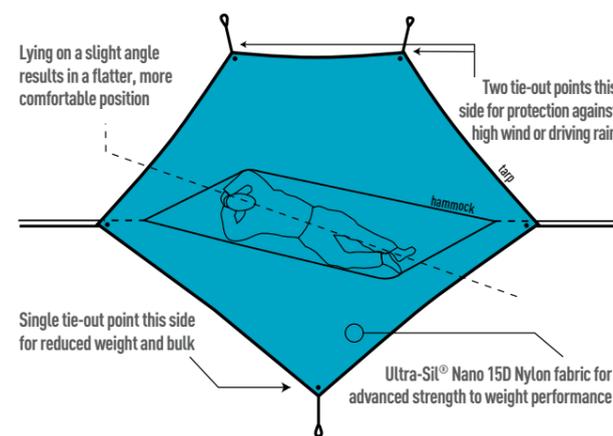

### Compression sack

Made from water and abrasion resistant, lightweight CORDURA® Nylon fabric.

Code	Description	Weight <sup>o</sup>	In-use Size (W x D)	Compressed Size
AHAMJNGOL	Jungle Hammock	775g	2.6 x 1.45m	Ø12 x 20cm

## HAMMOCK TARP

By providing the most effective coverage without adding excess weight or bulk, our Hammock Tarp compliments your lightweight and compact hammock. The minimalist design tapers towards the ends where the hammock narrows and has a single tie-out point on one side providing enough room to cook under while sitting on your hammock. Two tie-out points on the opposite side can be pegged close to the ground for protection against prevailing wind and rain.

Code	Dimensions	Weight
AHAMTARP	3.6 x 2.8m	350g

## HAMMOCK BUG NET

Our Hammock Bug Net is designed for easy set-up and effective protection from mosquitoes and other bugs while using your hammock. The breathability and comfort of a hammock is ideal for warm or tropical weather but flying and crawling insects are all too common. The Hammock Bug Net fits all Sea to Summit hammocks and will give you the peace of mind to enjoy the outdoors.

80cm | 31" collapsible pole spreads the mesh away from your body for a spacious feeling and protection from bugs that can bite through the hammock fabric

Code	Dimensions	Weight
AHAMBUG	2.95 x 0.8m	380g

## JUNGLE HAMMOCK TARP

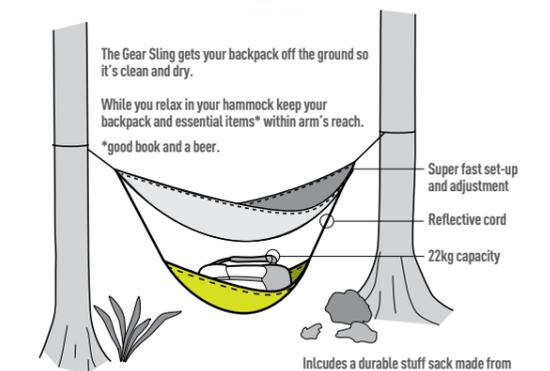

**NEW**

- Made from water and abrasion resistant, lightweight CORDURA® Nylon fabric
- Waterproof seams - double stitched and tape sealed
- Non-wicking anchor points with adjustable guy lines
- Siliconised outer surface with 2000mm waterhead

Code	Description	Weight <sup>o</sup>	In-use Size (W x D)	Compressed Size
AHAMJNGTARP	Jungle Hammock Tarp	450g	2.8 x 1.78m	Ø9 x 14cm

## GEAR SLING

A simple design to keep your backpack off the ground, and essential items within arm's reach. By essential, we mean a good beer and a book. Features super fast set-up and adjustment with Nylon cam-hook, reflective cord for visibility at night and a 22kg capacity.

Code	Dimensions	Weight
AHAMGS	1.4 x 1.4m	165g

## ULTRALIGHT SUSPENSION STRAPS

Designed for minimalist fast-packers and ultra-light adventurers, our new Ultralight Suspension Straps are 55% lighter (77g) and 45% smaller in packed-size (30mm) than our Pro Suspension Straps.

- Aluminium, quick-connect buckles for easy length adjustment
- Made with Dyneema® the world's strongest fiber™
- Extremely minimalist and compact
- For use with pre-2019 Sea to Summit Hammocks

Code	Dimensions	Weight
AHAMULSS	15mm x 2.5m (2pk)	77g

## PRO SUSPENSION STRAPS

When first launched, our Pro Suspension Straps redefined the usability and packed-size of hammock set-up. The quick-connect buckle system is minimalist, lightweight, and offers more flexibility in length adjustment. The use of 15mm webbing provides a packed-size of 100mm in diameter by 40mm in height, small enough to fit inside the hammock compression bag.

- Quick-connect buckles
- High tenacity, non-stretch 15mm webbing
- Packs into 40mm tall Ultra-Sil™ stuff sack
- For use with pre-2019 Sea to Summit Hammocks

Code	Dimensions	Weight
AHAMSS	15mm x 3.0m (2pk)	170g

## TREE PROTECTORS

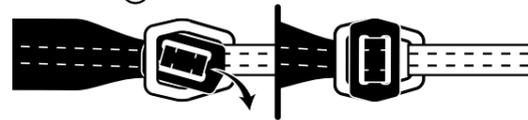

Our Tree Protectors will ensure that the trees you hang your hammock from will be there for many more generations. The 38mm webbing distributes the hammock load and reduces wear on the tree.

- Quick-connect buckles
- 38mm webbing distributes load and protects the tree
- Packs into 40mm tall Ultra-Sil™ stuff sack

① LOOP AROUND TREE, CAN BE EXTENDED FOR LARGE TREES

② CONNECT TO SUSPENSION STRAPS

## ESCAPIST™

Escape to the wild with this versatile and ultra-lightweight tarp shelter for minimalist adventurers

15D ULTRA-SIL™

Extremely lightweight and compact, our Escapist tarps feature eight tie-out points with pre-attached cord adjuster and reflective guy lines. These eight points hold the tip of a trekking pole allowing easy tension adjustment from underneath. The large Escapist Tarp comfortably sleeps two when set up as an A-frame and also makes a good tent awning or sun shelter. The medium protects two sleepers from the rain when set up close to the ground as an A-Frame.

- Ultra-lightweight and compact
- Eight durable bar-tack reinforced tie-out points
- Made from 15D Sil/PU coated 1,200mm waterhead rated Nylon

Medium in stuff bag

Large in stuff bag

A trekking pole can be placed through the circular bar-tack

Reinforced corner with cord lock and guy rope

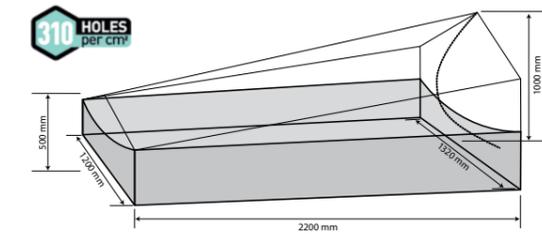

Code	Size	Dimensions	Weight

## GROUND CONTROL TENT PEGS

The Sea to Summit Ground Control Pegs are the perfect replacement pegs for your tent, tarp or shelter. The three sided design is extremely strong, and offers great holding power in soft or hard ground. In harder ground, where you might not be able to get complete penetration, you can utilise the multi-height guy points to minimise leverage on the peg.

- Made from anodised 7075-T6 alloy for maximum strength
- Luminescent pull loop for peg extraction; charges in sunlight, emits green glow at night
- Reflective pull loop cord to really stand out by headtorch
- Available in a pack of 8 pegs with peg bag or as a bulk set of 20

AI 7075-T6

# BUG PROTECTION

## Nano MOSQUITO PYRAMID NET

**80 HOLES per cm<sup>2</sup>**  
**15D ULTRA-VIS™**

These shelters maximise coverage with minimal weight and packed size—60% lighter and half the bulk of our standard pyramid nets! Nano Mosquito Pyramid Nets use an elasticised hanging cord and elasticised drawcord hem to keep the mesh under your mattress. 15D Ultra-Vis™ is a super light mesh with great visibility and air flow.

- Aluminium spreader pole for double version
- Elasticised hem for secure mattress fitting
- Elasticised hanging cord minimises snagging and aids in height adjustment
- Asymmetric shape for improved headroom
- Colour coded corners for easy set up
- Ultra compact 15D Ultra-Vis™ mesh
- Fine 80 hole/cm<sup>2</sup> hexagonal mesh

Code	Description	Dimensions	Weight
ANMOSS	Single	1.2 x 2.2 x 1m	82g
ANMOSD	Double	1.7 x 2.4 x 1.3m	137g
ANMOSSP	Single - <b>Treated</b>	1.2 x 2.2 x 1m	82g
ANMOSDP	Double - <b>Treated</b>	1.7 x 2.4 x 1.3m	137g

**Permethrin**    
**Treated Mosquito Nets**

Stops mosquitoes, bed bugs and other nasty bities.

## Mosquito PYRAMID NET

**80 HOLES per cm<sup>2</sup>**

Ideal for trekking, travelling and wilderness camping, these shelters provide essential protection against mosquitoes and other bugs. Our Mosquito Pyramid Net shelter has a unique tent-style design, which maximises coverage with minimum weight and packaged size. The 50D multi-filament polyester black mesh provides strength, durability and good visibility.

- Soft, multi-filament polyester is lightweight and compact
- Asymmetrical hanging point gives practical headroom
- Fine 80 hole/cm<sup>2</sup> hexagonal mesh
- Height is easily adjusted
- Colour coded corners for easy set up
- Tuck-in sides offer extra protection
- Packaged in its own stuff sack

Code	Description	Dimensions	Weight

AMOSDP	Double - <b>Treated</b>	1.7 x 2.4 x 1.3m	350g

## Ultra-Mesh™ HEAD NET

Are tiny biting insects ruining your outdoor experience? Do midges, black flies, no-see-ums or sand-flies gravitate towards you, leaving itching welts once they've had their way with you? Consider upgrading your headnet to our ultra-fine mesh. More than four times finer than our existing mosquito mesh, even the smallest biting insects won't be able to squirm their way through, leaving you bite-free.

- Packaged in a handy stuff sack for easy organisation
- Black mesh for improved vision
- Superlight elasticised neck draw cord with cord lock
- Ultra-fine mesh - 310/cm<sup>2</sup>
- Soft multifilament fibre

**310 HOLES per cm<sup>2</sup>**

**15D ULTRA-MESH™**

Code	Weight
AUMOSH	23g

## HEAD NET

Effective protection from annoying, disease carrying mosquitoes and other bugs. The design and colour are optimised for outward visibility. The neck drawcord is a generous length for tucking into collars.

- Helps prevent contraction and spread of Malaria, Japanese Encephalitis, Dengue Fever, etc
- Fine woven 80 hole/cm<sup>2</sup> mesh
- Packaged in a handy stuff sack

**80 HOLES per cm<sup>2</sup>**

Code	Model	Weight

AMOSH P	<b>Treated</b>	30g

## Nano HEAD NET

At 60% lighter than our standard head nets and twice as compact, our Nano Mosquito Headnet is comfortable and easy to use.

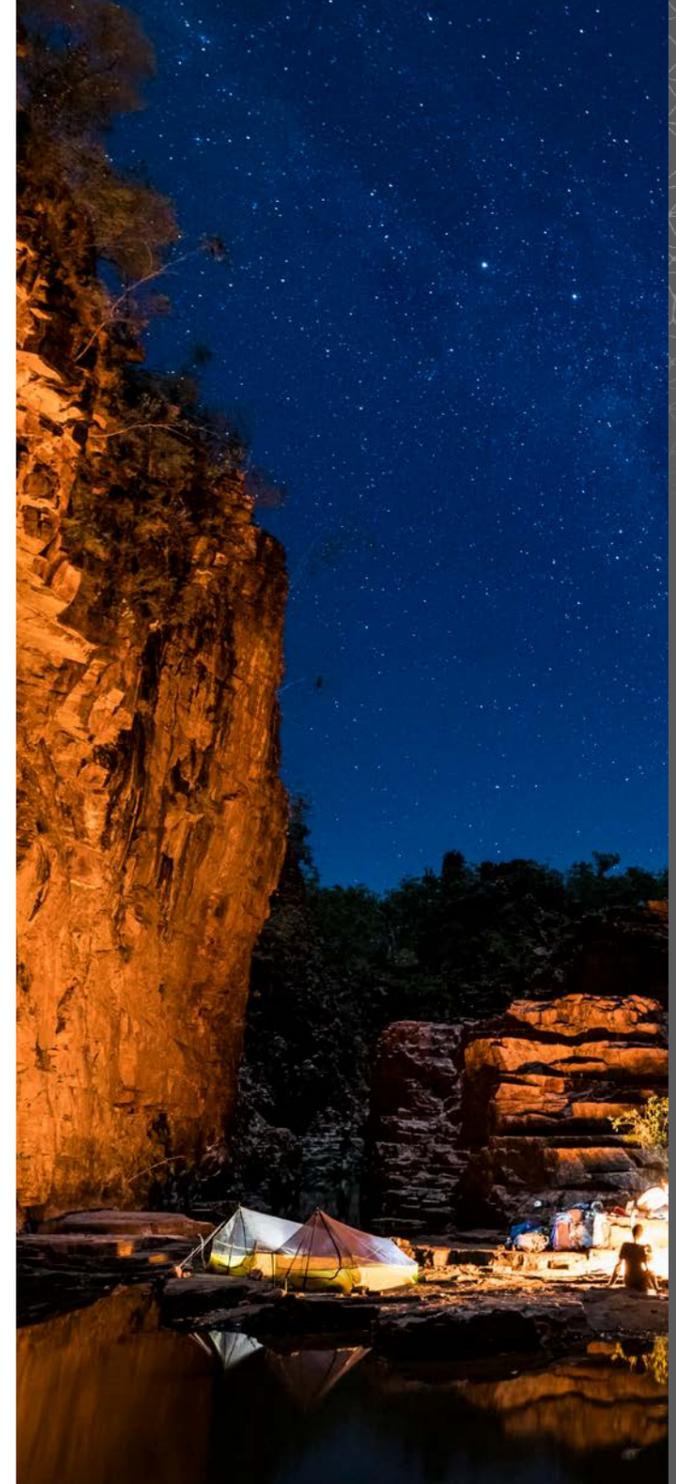

- 15D Ultra-Vis™ light mesh offers great visibility and air flow
- Fine, 80 hole/cm<sup>2</sup> hexagonal mesh
- Soft multi-filament fibre
- Superlight elasticised neck draw cord with cord lock

**80 HOLES per cm<sup>2</sup>**

**15D ULTRA-VIS™**

Code	Model	Weight
ANMOSH	Untreated	11g
ANMOSH P	<b>Treated</b>	11g

## Nylon TARP PONCHO

**70D WATERPROOF FABRIC**

Our Nylon Tarp Poncho features a seam taped three-panel hood construction with a wide brim. It accommodates a large backpack and comes packaged with an oval shaped stuff sack for best fit in a pack.

- Made of 70D coated Nylon
- Lightweight, waterproof fabric
- Accommodates a large backpack
- Easily converts to a two-person shelter
- Double stitched, tape sealed, three-panel hood

Code	Dimensions	Weight
APONCHO	137 x 253cm	400g

## Ultra-Sil™ Nano TARP PONCHO

**15D ULTRA-SIL™**

Our all-in-one raincoat/pack cover/tarp is made from double stitched and seam taped 15D Ultra-Sil™ Nano fabric. It is ideal as a rain shelter in hot climates or as an emergency shelter.

- Made with 15D Ultra-Sil™ Nano fabric
- Waterproof seams—double stitched and tape sealed
- Guy attachment points on corners to convert to shelter
- Sides snap together for rain protection when worn as a poncho
- Ergonomic three-panel hood with generous brim
- Siliconised outer surface won't wet out
- Accommodates a large backpack
- Drawcord raises rear hem when not used with a pack
- Only 230g

Code	Dimensions	Weight
APONCHO15D	145 x 265cm	230g

## Ultra-Sil™ Nano PONCHO

**15D ULTRA-SIL™**

Our 15D Ultra-Sil™ Nano Poncho offers an even smaller packed size and weight for situations when you don't need the versatility of our tarp poncho. Made from our seam taped 15D Ultra-Sil™ Nano, it's ideal for use in hot climates where a regular raincoat just won't offer enough ventilation. Also works brilliantly as an emergency rain cover at the football!

- Made from 15D Ultra-Sil™ Nano fabric
- Waterproof seams—double stitched and tape sealed
- Press studs offer the alternative of closing sides when in use

Code	Dimensions	Weight
APONSTD15D	140 x 118cm	145g

## Ultra-Sil™ PACK COVER

**CORDURA FABRIC** **30D ULTRA-SIL®**

Ending the debate about whether to carry a pack cover or not, the ultra-light Ultra-Sil™ Pack Cover offers a tiny yet compelling solution. Weighing only 113g for a 70L pack, why wouldn't you carry one?

- 30D Ultra-Sil™ siliconised CORDURA®
- 2,000mm waterhead
- No seam construction for water resistance
- Mid-back keeper strap on sizes S - L
- Packaged in its own Ultra-Sil™ stuff sack
- Drainage hole on the base

## Nylon PACK COVER

**70D WATERPROOF FABRIC**

Lightweight 70D Nylon offers a great combination of durability and low weight. Our Pack Cover has been contoured to fit today's hiking packs. Stores in a compact stuff sack when not in use.

- Made of 70D PU coated Nylon
- 2,000mm hydrostatic waterhead fabric
- Contoured for modern packs
- All seams are tape sealed
- Very compact when stowed

## Seam Sealed PACK CONVERTER Pack Cover/Duffle Bag

**210D STOPPER FABRIC**

This is our toughest pack cover, protecting your pack in pouring rain, treacherous terrain or from the world's roughest baggage handler. Our Pack Converter is one of the most versatile and useful travel products that you can own.

- All seams are tape-sealed
- Converts to a rain cover
- Contoured to fit internal frame packs
- Stow-away shoulder strap included
- Two carry handles, internally reinforced
- Use on its own as a lightweight duffle

Easily converts from a PACK COVER to a DUFFLE BAG

Code	Size	Fits Pack Size	Weight

APCONL	Large	75-100L	594g

## Ultra-Sil™ PACK LINER

Our Ultra-Sil™ Pack Liners provide an additional layer of protection for keeping your gear dry. They are oval, rather than round to better fit the internal contours of a backpack. The unique top closure has extra fabric at the top that folds in and fastens in place, then rolls down, creating a more compact closed loop at the top.

- Made of PU coated siliconised CORDURA® fabric
- Opens wide for easy packing when inside a pack
- Non-wicking closure strip ensures moisture is not drawn into the bag when rolled shut
- Double stitched, tape sealed seams
- Uses low profile buckles

## Waterproof PACK LINER

The Waterproof Pack Liner opens wide for easy packing and unpacking when inside a pack. Water-resistant to keep contents of pack dry. Tough fabric ideal for hunters who use their packs to transport game.

- 70D coated Nylon pack liner
- Non-wicking roll-top closure with stiffener at the top
- Hook and loop throat for excess roll top
- Double stitched, tape sealed

## Reflective ACCESSORY CORD

Strong and lightweight, our braided Reflective Accessory Cord is perfect as guy lines for tarps and tents, laundry line, and more. Made from hydrophobic polyester, the cord won't soak up water and add unnecessary weight. With the ultra-light backpacker in mind, we offer the cord in a tiny yet strong 1.8mm diameter as well as the standard 3mm version.

- Super bright reflective tracer
- Tight weave resists tangling
- Available in two diameters: standard 3mm and an ultra-light 1.8mm
- Sold in a thin sleeve that is easy to merchandise

Code	Diameter	Length	Rating
ARC10M	1.8mm	10m	13g
ARC5M	3mm	5m	26g

## Accessory CARABINER

Our ultra-lightweight anodised aluminium, wiregate, Accessory Carabiners come in a pack of three colours. Handy for many uses including keeping keys together, an emergency torch accessible in your daypack, attaching guy lines quickly to a tarp-poncho or hanging a lantern in your tent.

- Lightweight aluminium alloy body, spring-steel gate
- Sold in a pack of three
- Handy for many uses
- Pack has three different coloured carabiners: grey, blue, orange

Code	Dimensions
AABINER3	40 x 23mm

# GAITERS

## QUAGMIRE

The Quagmire provides incredible fit and features as well as a heavy duty eVent® upper for breathability and durability. When you're on narrow scrubby tracks or getting really close to nature, you'll appreciate the shin protecting 50mm hook-and-loop front opening. The heavy duty laminated instep scuff pad also improves durability and wear.

- 50mm hook-and-loop adjustable front opening gives fantastic fit, easy access and shin protection
- 1,000D Kodra boot section with lining
- Made with tough durable direct venting eVent® upper
- Super hard-wearing replaceable underfoot strap
- 316 stainless steel lace hook

eVent

## AlphaSet CUTLERY SET

Alpha utensils have thicker and sturdier handles than the AlphaLight series, but are still very lightweight. The set includes a knife, fork and spoon (three items) plus a mini-carabiner to hold them together. The individual utensils in this set have several holes punched out of the handle to reduce weight.

- Tough and lightweight for life long use
- Comes with a carabiner to keep items together
- M3, M4 and M5 hex tools integrated into handles

Code	Description	Weight
ACUTASET3	3 Piece: knife, fork and spoon	37g

## Titanium CUTLERY

Titanium remains a premium material for camp cutlery providing exceptional durability. Our Titanium Cutlery pieces are very rigid, and won't break if they end up awkwardly placed in the bottom of your pack. Titanium is lightweight while being incredibly strong, is food safe, has a very high resistance to corrosion and will last longer than an alloy equivalent.

- Compact and incredibly lightweight
- Carabiner included with each item
- Perfect gift idea

Code	Description	Weight
ACUTTSPK	Spork	12g
ACUTTSET3	3 Piece: knife, fork and spoon	40g

## AlphaLight CUTLERY

AlphaLight Cutlery uses a durable hard-anodised aircraft grade aluminium combined with a sleek yet strong shape to create an extremely lightweight utensil at a surprisingly affordable price. By hard anodising the aluminium it forms a kind of "exoskeleton" so the shape of the utensils can be slimmer and lighter. This hardened shell also encapsulates the aluminium, so there's no risk of the alloy leaching into food.

- Lightest metal cutlery on the market
- Ultra-light, strong aircraft aluminium alloy
- Smooth matte finish
- All pieces come with a mini carabiner

Code	Description	Weight

# SIGMAPOT™

Our premium grade stainless steel SigmaPots™ provide long-lasting performance for your outdoor kitchen.

Engineered with premium marine grade stainless steel, our new SigmaPot™ range is strong, lightweight and offers a durable, abrasion resistant and easy-to-clean cooking surface for your outdoor camp kitchen needs.

Designed for compact packing and convenient handling, our SigmaPot™'s unique patent-pending PIVOT-LOCK™ handle rotates horizontally, locking in place for a secure and ergonomic grip when in use and folds away keeping the lid locked to the pot for low-profile storage.

The black powdered silicone coating on the base reduces hot spots and helps to keep your pot from sliding around on camping stoves, while the integrated LID KEEP™ cleverly stores the straining lid out of the dirt.

Our compact nesting SigmaPots™ are compatible with our SigmaPans™, DeltaLight™ range of camp dinnerware and also our aluminium AlphaPots™ and AlphaPans™.

Textured powdered silicone base

## X-POT

X-Pots collapse and nestle inside each other to form compact cooking and eating sets that suit any activity and group size. The hard anodised aluminium base provides the perfect campstove cooking surface.

## X-Pot KETTLE 1.3L

The X-Pot Kettle is a tiny addition to your kit collapsing to 35mm. A one litre safe boiling capacity is perfect for a warm drink or soup on the trail. The X-Pot Kettle is all you need for two warm freeze dried meals in one boil. If you prefer fresh rice or pasta, the wide rim and stable handles allow it to be used as a 1.3L pot with easy stirring.

- Wide base absorbs maximum heat from the stove while protecting the silicone walls
- Two glass-reinforced Nylon 6-6 handles support the upper rim and improve control when pouring
- A silicone strap secures the lid and handles during transport
- Two X-Mugs or X-Cups fit inside the X-Pot Kettle while the kettle itself can fit inside the X-Pot 1.4L and X-Pot 2.8L as a compact cook system
- Collapses to 35mm

Code	Volume	Weight
AXKET1.3LI	1.3L	186g

## X-Pot 1.4L

This small pot is a great size for a solo camper. No one likes having excess dirty dishes in the back country so the X-Pot 1.4L has been designed to fulfill both the requirements of a pot and a bowl. Whip up your favourite stir-fry and eat straight from your cooking pot.

- Stainless steel ring embedded in the rim for lifting and stirring
- Supporting pot in an X-Series cook system
- Silicone handles lock on the lid to secure an X-Pot Kettle, X-Bowl and smaller X-Series products inside during transport
- Collapses to 40mm

Code	Volume	Weight
AXPOT1.4OR	1.4L	250g

## X-Pot 2.8L

The X-Pot 2.8L is the original fully featured, collapsible cooking pot. The capacity is ideal for 2-3 campers. The silicone walls are constructed from five folding segments which means increased expanded height while still packing down to only 40mm. The lid features a built-in strainer and can be locked to the pot with the folding handles for transport.

- The X-Pot 2.8L can hold the X-Pot Kettle, X-bowls and smaller X-Series products
- The X-Pot 2.8L fits inside the X-Pan 8 and the X-Pot 4L
- Collapses to 40mm

Code	Volume	Weight
AXPOT2.8PB	2.8L	325g

## X-Pot 4L

Designed for group camping the X-Pot 4L uses a three-segment wall construction and a thicker stainless steel ring in the rim to create an exceptionally rigid structure for confidence in stirring large volumes of food.

- Increased radius on the edge of the base allows larger stirring utensils to get into the corners
- The silicone handles can wrap over the rim of the pot to provide improved grip while stirring
- The 4L X-Pot snugly holds 2.8L X-Pots or X-Plates inside and smaller X-Series products
- Collapses to 45mm

Code	Volume	Weight
AXPOT4.0RD	4L	545g

## X-Pan 8"

This 8-inch frypan shares the same ideals as the X-Series and fits into the nesting system. The streamline frypan is pressed from hard-anodised 5052 aluminium creating a very light and stiff structure. We've cut down the weight by forming a minimalist handle hinge and cutting off the upper edge of the pan that isn't needed.

- Stiff and non-corrosive stainless steel handles fold up for use and down for transport
- The handles have a heat-resistant silicone grip for non-slip lifting and holding
- The 2.8L X-Pot locks inside the X-Pan 8" by friction fit

Code	Diameter	Weight
AXPAN8INOR	20cm / 8 inch	245g

## X-BREW

A two cup collapsible coffee dripper with a reusable mesh filter.

- Features a reusable stainless steel mesh filter, no paper filters required
- Use with coffee grounds and hot water for freshly brewed coffee
- Folds to 20mm and fits inside the X-Pot Kettle

Code	Volume	Weight
AXBREWPB	480ml	85g

## X-Set 11

A two-person kettle and mug set for hot coffee and soup on the trail. The wide rim and stable handles allow it to be used as a 1.3L pot with easy stirring.

- Includes one lime 1.3L X-Pot Kettle, one blue X-Mug, and one grey X-Mug
- 1L safe boiling capacity
- Wide aluminium base absorbs maximum heat
- X-Set 11 fits inside the X-Pot 1.4L and X-Pot 2.8L as a compact cook system
- Collapses to 35mm

Code	Description	Weight
AXSET11LI	X-Set 11 - X-Pot Kettle 1.3L, 2 X-Mugs	316g

## X-Set 21

A compact collapsible cooking and dining set for solo campers. The X-Pot 1.4L can also be a supporting pot in an X-Series cook system.

- Includes one orange 1.4L X-Pot, one Pacific blue X-Bowl and one grey X-Mug; collapses to 40mm
- Fits inside the X-Pot 4L

Code	Description	Weight
AXSET21OR	X-Set 21 - X-Pot 1.4L, 1 X-Bowl, 1 X-Mug	394g

## X-Set 31

A collapsible, two-person cook system featuring an award-winning 2.8L X-Pot for camp stove cooking, two X-Bowls and two X-Mugs.

- Cooking and dining for two collapsing to 40mm
- 600ml X-Bowls and 480ml X-Mugs
- Collapses to 40mm

Code	Description	Weight
AXSET31PB	X-Set 31 - X-Pot 2.8L, 2 X-Bowl, 2 X-Mug	607g

## X-Set 32

A comprehensive cook system perfect for preparing a variety of meals while camping. The set includes one orange X-Pan 8", one grey 2.8L X-Pot, and one lime 1.3L X-Pot Kettle.

- X-Pot 2.8L can be secured inside X-Pan 8" by friction fit
- Collapses to 45mm

Code	Description	Weight
AXSET32GY	X-Set 32 - X-Pot 2.8L, X-Pan 8", X-Pot Kettle 1.3L	756g

## X-Set 33

A versatile, two-person cook system. Includes a Pacific blue 2.8L X-Pot and a lime 1.3L X-Pot Kettle.

The X-Pot Kettle's ability to be used as a small pot enables you to either prepare an entree, soup or a warm drink with your main meal.

- Fits inside the X-Pot 4L so you can prepare a range of meals at once
- Collapses to 40mm

Code	Description	Weight
AXSET33PB	X-Set 33 - X-Pot 2.8L, X-Pot Kettle 1.3L	551g

# X-SERIES RANGE

Made from flexible food grade silicone, our collapsible X-Series is lightweight, compact and durable

## X-SEAL & GO™

X-Seal & Go are a range of collapsible food containers. The threaded lids provide peace of mind against spillage. Containers collapse to a minimal height, taking up significantly less space in your bag. Perfect for culinary adventures on the trail, as well as taking lunch to the office. Durable and easy care with the highest quality food-grade materials. Microwave and dishwasher-safe.

### X-Seal & Go™ SMALL

## X-SHOT™

Ideal for that early morning espresso or perhaps a shot of something a bit stronger, the collapsible X-Shot is a fun addition to any camp kitchen.

- Robust, folds flat for compact packing
- Food grade flexible silicone
- Calibrated as a measuring cup
- 6.5cm diameter x 6.5cm height
- Compact; folds to 12mm

Code	Volume	Weight
AXSHOT	75ml	24g

## X-CUP™

The compact X-Cup is perfect for smaller hands or just smaller amounts. The rigid ring within the rim keeps it sturdy and easy to drink out of while still allowing the cup to be collapsed into a flat disk that will fit almost anywhere.

- Robust, folds flat for compact packing
- Food grade flexible silicone
- Calibrated as a measuring cup
- 9.5cm diameter x 7cm height
- Compact; folds to 15mm

Code	Volume	Weight
AXCUP	250ml	45g

## X-MUG™

Double the size of the X-Cup, the X-Mug can hold plenty to drink. The rigid ring within the rim keeps it sturdy and easy to drink out of while still allowing the cup to be collapsed into a flat disk that will fit almost anywhere.

- Robust, folds flat for compact packing
- Food grade flexible silicone
- Calibrated as a measuring cup
- 11cm diameter x 8.5cm height
- Compact; folds to 15mm

Code	Volume	Weight
AXMUG	480ml	60g

## X-BOWL™

The flexible food grade silicone upper is securely bonded to a rigid, cut-resistant base made of high temperature resistant, food grade Nylon.

- Robust, folds flat for compact packing
- Food grade flexible silicone
- Calibrated as a measuring cup
- 12.5cm base diameter x 5.5cm height
- Compact; folds to 15mm

Code	Volume	Weight
AXBOWL	650ml	80g

## XL-BOWL™

The XL-Bowl features the same cut resistant base as the X-Bowl, but it is 77% larger.

- Robust, folds flat for compact packing
- Food grade flexible silicone
- Calibrated as a measuring cup
- 15cm base diameter x 5.5cm height
- Compact; folds to 15mm

Code	Volume	Weight
AXLBOWL	1150ml	110g

## X-PLATE™

The flexible food grade silicone upper of this plate is securely bonded to a rigid, cut-resistant base made of high temperature resistant, food grade Nylon.

- Robust, folds flat for compact packing
- 20cm diameter x 3.5cm height
- Compact; folds to 15mm

Code	Volume	Weight
AXPLATE	1170ml	164g

# DELTA RANGE

**BPA FREE**

## DeltaLight™ SOLO SET

**NEW**

A space-saving dinnerware set for solo adventurers that includes a DeltaLight™ Bowl, Mug and Delta™ Cutlery Set. Designed to nest and stow inside a lightweight storage pouch, this compact set also nests inside our Alpha™ and Sigma™ Pot 2.7L.

Made with BPA-free, glass reinforced polypropylene our DeltaLight™ bowls, Mugs and Cutlery Sets are durable, lightweight, easy-care and microwave and dishwasher safe.

- Lightweight, durable and easy-care
- BPA-free, food grade material that is microwaveable and dishwasher safe
- Comes with a lightweight Nylon storage pouch
- Delta Cutlery Sets stow inside the DeltaLight™ Bowls and the spoon's curve allows you to scrape the bowl clean
- Generous volumes in our DeltaLight™ Insul Mug and Bowls
- Graded measuring scale in our DeltaLight™ Insul Mugs
- Set nests inside our Alpha™ and Sigma™ Pot 2.7L.

## DeltaLight™ TUMBLER

**NEW**

Enjoy your favourite backcountry beverage in Sea to Summit's DeltaLight™ Tumbler—a space-saving, safe alternative to glassware.

Designed to be stackable and packable, the DeltaLight™ Tumbler's unique ovalised shape makes it easy to store on its side—allowing these compact cups to nest inside our DeltaLight™ Bowls, Alpha™ and Sigma™ Pots.

With a generous 350ml capacity and handy volumetric measure that includes standard pours for shots and wine (you're welcome), this outdoor tumbler is ideal for soda, beer, wine or mixed drinks.

Made from tough and light BPA-free, food grade transparent Tritan™, its fluted ribbed sidewalls provide a comfortable grip, even with hot drinks.

- Unique low-profile ovalised shape for excellent packability
- Impact resistant and safe alternative to glassware
- Fluted ribbed sidewalls reduce heat transfer of hot beverages
- Made from tough, light and BPA-free Tritan™ co-polyester
- Handy volumetric scale that includes shot and wine measurements
- Two straight sidewalls allow Tumbler to nest inside our DeltaLight™ Bowls, Alpha™ and Sigma Pots
- Generous 350ml volume suits bottled beer, wine and sodas

Code	Description	Colour	Volume	Weight
ADLTUM2	DeltaLight Tumbler 2pk	Clear Transparent	350ml	104g

## DeltaLight™ INSUL MUG

Employing lightweight yet durable glass reinforced polypropylene, our DeltaLight™ Insul Mugs are cleverly designed to stack together and nest inside the DeltaLight™ Bowls and AlphaPots™ for compact storage. Featuring an easy sipping silicone lid and generous 350ml capacity, these insulated mugs are available separately or as part of the DeltaLight™ Camp Set 4.4 and our AlphaSets™.

- BPA-free, food grade material which is microwaveable and dishwasher safe
- Removable insulation sleeve and easy sipping silicone lid that fold inside mug for compact packing
- Fluted ribbed walls for increased insulation when used with the sleeve and a comfortable grip when used without
- Graded volumetric scale for easy measurement
- Nests inside DeltaLight™ Bowls and AlphaPots™

## Delta MUG & INSULMUG

PROTEX™ HEX  
PATTERN BASE

These lightweight mugs feature Sea to Summit's patented Protex™ hex pattern base which reduces weight and disperses surface temperature.

The Delta InsulMug features a ground-breaking advance in thermal insulation: a moulded non-absorbing closed-cell ThermoSkin. A snug-fitting, self-draining lid allows drip-free sipping. Ideal for expeditions, camping and daily commuting.

- Protex™ hex pattern base disperses heat
- ThermoSkin non-absorbing insulation sleeve on the InsulMug
- Cool-to-touch rim
- Odour and stain resistant
- Food grade and BPA free
- Dishwasher safe

ADINMUG	Delta InsulMug	473ml	106g

## Delta BOWL & BOWL WITH LID

PROTEX™ HEX  
PATTERN BASE

The Delta Bowl features our patented Protex™ hex pattern base which reduces weight and disperses surface temperature. The thumb grip keeps your fingers out of your food and also doubles as a carabiner hang loop. Specifically designed with steep side walls to keep food and liquids from slopping over the edge, the 20° curvature also perfectly matches the Delta Spoon and Sporks. The lid forms a press fit over the bowl and doubles as a preparation surface.

- Protex™ hex pattern base disperses heat
- Measurement increments on the inside
- Hard wearing and cut resistant
- Easy hold thumb grip
- Food grade and BPA free
- Dishwasher safe

## Watercell ST

Sea to Summit's Watercell ST is your streamlined water storage solution for lightweight adventures.

Minimalist, strong and pliable, our Watercell ST's compact 3D shape and internal baffle design makes it manageable and easy to fill, stow, stack and drain.

Engineered using RF welded seams for ultimate strength and reliability, it's made from abrasion resistant semi-translucent TPU for flexibility and durability. The food-grade TPU is also BPA, PVC and taste-free.

The strategically positioned water resistant grab-handles offer carry and lashing options while the screw-top standard wide-mouth opening, and low-profile fill handle make filling effortless.

The upright cell structure provides efficient use of the internal volume and allows the Watercell ST to drain completely for drying at the end of a trip.

- Strong RF welded 3D shape with internal baffle for ease of use and compact packing
- Abrasion resistant semi-translucent TPU for flexibility and durability
- Screw-top standard wide-mouth opening
- Low-profile fill-handle for one-handed manageability
- Strong, streamlined grab-handles double as lash points
- Food-grade TPU that is BPA, PVC and taste-free

## Watercell X

Sea to Summit's Watercell X is your complete water storage and dispensing solution for trail, road and water-based adventures.

Our Watercell X combines smart design, robust materials and ultimate functionality to create a unique soft-cell multi-use water storage and dispensing solution. Its compact 3D shape and internal baffle design makes it manageable and easy to fill, stow, stack, hang and drain.

The unique multi-function low-profile cap combines flow-control, an easy to fill standard wide-mouth opening and extra-small shower attachment for complete versatility on the trail.

Its waterproof webbing strap provides adjustable handles for carrying, multiple lashing point options, and a hook buckle for effortless hanging. The strategically positioned fill-handle makes filling easy while the upright cell structure provides efficient use of the internal volume and allows the Watercell X to drain completely for drying at the end of a trip.

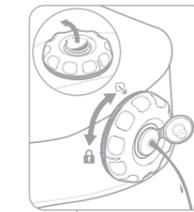

- Strong RF welded 3D shape with internal baffle for ease of use and compact packing
- Multi-function cap with customisable flow-control and standard wide-mouth opening
- Adjustable webbing strap system for carrying, lashing and hanging
- Extra-small shower fitting attaches to webbing strap for safekeeping
- Food-grade TPU lining is BPA, PVC and taste-free
- Made from flexible and abrasion-resistant 400D Nylon fabric for durability and easy packing
- Watercell X Hydration Tube available separately and includes a BPA, PVC and taste-free standard quick connect hydration tube and self-sealing silicone bite valve

## Watercell X HYDRATION TUBE

Compatible with all Watercell X sizes, the Watercell X Hydration Tube converts your water storage bladder into an on-the-go hands-free hydration system.

The durable food-grade TPU tube is non-kinking and its standard quick connect fitting is compatible with many outdoor hydration and filtration systems.

The self-sealing silicone bite valve has a 45-degree angle for ergonomic delivery and an additional push-pull shut-off valve for added security.

- Compatible with all sizes of Watercell X bladders (not compatible with Watercell ST range)
- Durable TPU non-kinking hose
- Convenient, standard quick connect fitting, compatible with many outdoor hydration and filtration systems
- Ergonomic self-sealing silicone bite valve with additional shut-off valve
- Food-grade TPU that is BPA, PVC and taste-free

## PACK TAP

Hang this from a tree at the campsite and you have bulk water literally on tap! Our multiple sizes mean you can have water storage for individual or group use. Flexible fabric allows the pack tap to fit into a kayak or pack as necessary. Great for transporting water in arid environments or having a water source in camp. Multiple lash points allow you to hang or secure the Pack Tap in many locations while allowing for one-handed operation.

- Double layer tough Mylar bladder
- Replacement bladders available in two sizes to fit the four models
- Easy one-handed operation
- Tough Nylon exterior
- Security cap on tap

Durable anchor points

Flexible and foldable

No leak cap

Single hand operation

## FOLDING BUCKET

The ideal lightweight solution for carrying and storing water in the outdoors. The Folding Bucket is made from non-absorbent, food grade TPU-coated Nylon—210D around the sides, 420D on the base for added strength. The carry handle is made of a dual layer 420D Nylon. Additional grab handle on the base makes pouring easy. Packs down small and light

- Free standing on level surfaces
- Non-absorbent fabric
- Welded watertight construction
- Additional handle for easy pouring
- Food grade coating—PVC-free

Code	Size	Weight
AFB10	10 Litre	80g
AFB20	20 Litre	110g

## KITCHEN SINK

Great for collecting and carrying water for purification, cooking, washing dishes or personal bathing.

- Unique design with stainless steel stiffening ring that prevents the sink from collapsing when full
- Base is broader than top so it won't tip over in use
- Fine to use with hot water and detergent
- Fully taped seams
- Wide webbing carry handles
- Packaged with mini storage pouch
- 5 litre size makes an excellent dog bowl

Code	Size	Weight
ASINK5	5L	98g
ASINK10	10L	134g
ASINK20	20L	188g

## Ultra-Sil™ FOLDING BUCKET

Made from 30D siliconised CORDURA® Nylon fabric for exceptional strength, the Ultra-Sil™ Folding Bucket is 65% lighter than our standard 10 Litre Folding Bucket. Comes with a micro stuff sack.

- 10 litre capacity
- Lightweight and compact - only 28g
- Fully seam sealed and leak proof
- Micro stuff sack for convenient packing
- Ideal for carrying water back to camp
- Not designed for water storage because unlike our standard Folding Bucket this ultra-light version is not free standing

Code	Weight
AUSFB10	28g

## Ultra-Sil™ KITCHEN SINK

High-tech materials such as Ultra-Sil™ fabric, durable carry handles and a stainless steel wire stiffener ring mean this sink is small enough to fit in a pocket and light enough to barely leave a trace on a set of scales.

- 10 litre capacity
- Super lightweight - only 49g
- Made from Ultra-Sil™ 30D siliconised CORDURA® fabric for exceptional strength
- Fully seam sealed and leak proof
- Lightweight, strong and durable carry handles
- Stainless steel wire rim for strength
- Micro stuff sack for convenient packing

Code	Weight
AUSSINK10	49g

## POCKET SHOWER

Made of the same waterproof fabric and roll-top closure as our lightweight dry sacks, our Pocket Shower features a compact shower head that operates with an easy-to-use on/off twist mechanism. The twist spout also serves to adjust the flow of water, delivering an efficient trickle up to a free-flowing shower.

Fill the 10 Litre Pocket Shower, roll it to close at the top and hang it from two tough D-rings with the lightweight cord provided. The black fabric soaks up sun during the day at base camp for a warm shower or fill it at the end of the day for a cool rinse.

- Super compact and light - zips into a small pouch and weighs just 120g
- Gives about a 7-8 minute shower
- Contoured shower head with graduated apertures for equal spray dispersion
- Can be used as a dry sack when not in use as a shower
- Bar tack attached Delrin™ D rings and six metres of cord included

**70D WATERPROOF FABRIC**

Code	Weight
APSHOWER	120g

## Alloy POCKET TROWEL

A super strong, lightweight and cleverly compact pocket trowel. Designed to support the Leave No Trace ethic of minimising back country impact by humans, the Pocket Trowel redefines the camp trowel with its collapsible, carry-anywhere design and amazing strength-to-weight ratio.

- Strong ultra-light 6066-T6 aluminium alloy
- Hard anodised blade to Rockwell C 70
- Ingenious collapsible, carry anywhere design
- Stores lighter/toilet tissues in handle
- Lightweight, compact and easy to carry
- Comes complete with its own Ultra-Sil™ stuff sack

Code	Weight
APTROWEL	100g

## Reinforced Nylon POCKET TROWEL

The cousin of our Pocket Trowel, this latest tool is made with extra tough reinforced Nylon 66 to uphold your outdoor ethics in cold temperatures and hard ground.

- Strong, ultra light reinforced Nylon 66
- Compact, lightweight design for easy packing
- Storage space in handle for lighter/toilet tissue
- Withstands extremely cold temperatures

Code	Weight
ASTOOL	87g

## Ultra-Sil™ OUTHOUSE

With an internal toilet roll holder the Outhouse dispenses toilet paper on demand, and can be hung from a nearby tree or even around the neck for bathroom convenience. Perfect for group use, the Outhouse can be kept centrally for both easy access and as a 'vacant/occupied' sign.

- Made of our very lightweight Ultra-Sil™ fabric
- Fully waterproof non-wicking roll-top closure
- Ideal for group use
- Neck cord attached
- Internal dispenser allows upside down use
- Accommodates full size toilet roll
- Toilet paper not included

**30D ULTRA-SIL®**

Code	Weight
AOH	50g

## TRASH DRY SACK

Designed with a unique roll-top closure that accepts a disposable garbage bag liner, the Trash Dry Sack is great as a soft garbage container in the field, in a boat or in your car. Roll the top down to prevent any leakage while transporting. Durable clip-in loops allow it to be hung from a tree or tied to the outside of a pack.

- Oval base gives flatter shape when attached to packs or kayaks
- Daisy chain webbing and durable clip loops for easy attachment
- Waterproof roll-top closure for drip-free carrying
- Lightweight, 10,000mm waterproof fabric
- Double stitched and tape seam sealed
- Uses any plastic garbage bag as liner
- Min. Garbage Bag Size: 40 x 60cm

**70D WATERPROOF FABRIC**

Code	Weight
ATRASHDS	100g

## CLOTHESLINE

Australians have long been innovators in the field of clothes drying. Sea to Summit is proud to continue this tradition with this no stretch, no peg, adjustable clothesline. Light and compact enough to travel with.

- Clothesline measures 3.5 Metres
- Unique beaded cord design secures items even in the wind
- Reflective cord for visibility at night
- Stows away in the tiniest neoprene pouch
- Packed size 50 x 70 x 20mm
- Weighs just 25g

Code	Length	Weight
ACL0TH	3.5 Metres	25g

## WILDERNESS WIPES

Wilderness Wipes will clean and refresh you when a shower, or even just water, isn't a possibility. The extra thick Viscose® non-woven fibre is soft and gentle on your skin, removing salt and unpleasant odours caused by sweat, with no need to rinse. Formulated to be gentle to your skin and the environment, Wilderness Wipes are pH balanced for human skin and are readily compostable after use.

- Compostable 100% Viscose® fibre
- Extra thick wipes
- Available in two sizes
- Contains aloe vera and vitamin E
- Skin friendly
- Resealable packet

Code	Description	Dimensions	Colour	Pack Quantity
AWWL	Wilderness Wipes Extra Large	20 x 30cm	White	8
AWWC	Wilderness Wipes Compact	16 x 20cm	White	12

## WILDERNESS WASH

Our super concentrated Wilderness Wash goes a long way, it is gentle on fabrics and skin but effective on dishes and laundry stains. Available in our popular "Pocket Soap" (50 leaves) version, and in two liquid versions—one unscented and one with Citronella and Sandalwood essential oils to help deter bugs and odours. Although all versions are biodegradable, we recommend you always "Leave No Trace" outdoors by washing at least 100m from waterways.

- Biodegradable / Environment friendly
- Tough leakproof bottle with small nozzle and secure lid
- Phosphate and paraben free
- Safe for personal use, pots, pans, clothes or any outdoor gear
- 40ml and 89ml size complies with airline carry-on regulations including TSA in USA
- Super thick concentrated formula
- Three sizes including 40ml, 89ml, 250ml

# AIRLITE TOWEL

Lightweight, super compact and exceptionally fast drying, our minimalist Airlite Towel won't slow you down

Our towel range now includes the Airlite: an ultralight and super compact towel designed for minimalist adventures and everyday activities.

The Airlite fabric is 50% lighter than our Pocket Towel™. Like all our towels, it is made from microfibre yarn allowing it to absorb over three times its weight in water. The low fabric weight results in a high surface area making the Airlite our fastest drying towel. After use, simply tie it to your backpack and it will dry in no time.

By laser-cutting the edge instead of over-locking, we have further reduced the exceptionally small packed size so it fits easily in a backpack waistbelt, gym bag or travel tote.

The storage stuff sack is connected with a press stud to keep them together and can be disconnected during use. When hanging the towel, reconnect the stuff sack and hang on the webbing strap. They are colour-matched to the towel and clearly labelled for easy identification.

- Fast drying
- Tiny packed size
- 40% lighter than our Pocket Towel™
- Easy storage in its 15D Nylon stuff sack
- Elongated proportions for dual use as a bandana or for neck protection
- Perfect for sweat management during sport
- Doubles as an ultralight dishcloth

Code	Size	Packed Size	Dimensions	Weight
AAIRS	Small	5.5 x 4cm	36 x 36cm	12g

# POCKET TOWEL™

Our Pocket Towel™ is light and compact and absorbs three times its own weight in water. The knit we use for the Pocket Towel™ is very light, making it soft and silky to touch. Pocket Towel™ is fast drying, just wring it out and use it again.

- Whisper light, yet silky soft and durable
- Woven technical fabric that's ultra-absorbent and remarkably fast-drying
- Absorbs three times its own weight in water
- Packs into its own soft, zippered EVA case
- Press-stud loop for convenient hanging
- Machine washable

# DRYLITE TOWEL™

Our Drylite Towels™ are not only soft and super absorbent they also dry incredibly fast. They pack down smaller than the Tek Towels™ and come in a mesh bag. The luxurious chamois feel makes them a popular travel companion, especially when weight and pack size matters.

- Polyester/Nylon 70/30% microfibre blend stays softer for longer
- Microfibre with super soft ultra suede finish
- Mesh-faced storage pouch
- Remarkably absorbent and fast drying
- Lighter and more compact than the Tek Towel™
- Press-stud tab for convenient hanging
- Machine washable

## SEA TO SUMMIT TRAVELLINGLIGHT®

The Sea to Summit TravellingLight® range is a lightweight, stylish solution to luggage organisation. This comprehensive line up of travel accessories provides a convenient way to separately pack clothes, shoes, toiletries, documents and other travel essentials without taking up precious space or tipping the scales towards excess luggage fees.

### START WITH LESS

Whether motivated by the convenience of carry-on, avoiding baggage fees or lost luggage, or wanting manageable luggage, travellers today want less weight and less bulk. This doesn't necessarily mean bringing less; it means using compact and lightweight gear that helps keep you organised. The Sea to Summit TravellingLight® range of travel products does just that.

### GO MODULAR

The innovation of the TravellingLight® line is not just the use of technical ultra-light materials, but the shapes and designs that fit the contours of modern soft sided luggage including carry-on, rolling duffle bags or backpacks. Packing becomes simpler, going through security is faster and everything is easy to find at your destination.

EIGHTY PERCENT OF THE PRODUCTS IN THE LINE **WEIGH LESS THAN 85 GRAMS!**

Using premium Ultra-Sil™ ripstop fabric, the range weighs significantly less than competing products without compromising strength, durability or performance.

## TravellingLight® TOILETRY

Ultra-lightweight and water resistant CORDURA® fabric keeps toiletry spills contained while internal zippered mesh pockets ensure that you stay organised - all without adding bulk.

## TravellingLight® HANGING TOILETRY BAGS

Our versatile Hanging Toiletry Bags provide a great way to keep all toiletry essentials at your fingertips whether taking a shower outside under the stars or in a five star hotel. Separate mesh compartments mean contents are easily visible and accessible and the low profile design is an added bonus in tight-for-space bathrooms. Includes a detachable mirror.

- Hanging design for easy use
- Multiple internal pockets for convenient organisation
- Internal mesh pockets provide content visibility
- Detachable mirror included
- Durable zips with strong grab tags for easy, secure opening and closing
- 30D Ultra-Sil™ CORDURA® fabric
- Lightweight, strong and water-resistant

Code	Description	Volume	Weight

# TravellingLight® PACKING

TravellingLight® keeps clothes neat, smelly shoes contained, shirts uncreased, and undergarments undercover without adding bulk or weight.

## TravellingLight® GARMENT MESH BAGS

The flat rectangular profile of our Garment Mesh Bags makes neat, organised and crease-free packing easy. The Small has been designed for incidental items like underwear, swimwear, socks and other accessories. The medium is ideal for shirts and shorts while the large caters for sweaters, jackets and pants.

- Ideal for fast, compartmentalised packing, keeps clothes neat, organised and crease-free
- Mesh lid provides quick identification of contents
- Ultra lightweight, packs flat when empty
- Super light, strong and water resistant Ultra-Sil™ fabric made with CORDURA® yarn
- Durable zips with strong grab tags for easy, secure opening and closing

Code	Description	Volume	Weight
ATLGMBMS	Small	4L	60g
ATLGMBM	Medium	8L	86g
ATLGMBL	Large	11L	110g

## TravellingLight® PACKING CELLS

Our TravellingLight® Packing Cells are ideal for keeping socks, underwear and clothing accessories like beanies, gloves and scarves together. Available in three sizes, there is a Packing Cell to suit most luggage types and occasions. All have mesh lids to allow for quick identification of contents grab tags for easy opening and closing. If you are regularly on the move these lightweight, strong and water resistant Packing Cells are a time saving and organisational must.

- Mesh lid gives quick identification of contents
- Large grab handles for easy packing and unpacking
- Piping along the frame allows the cells to be free standing
- Durable zips with strong grab tags for easy, secure opening and closing
- 30D Ultra-Sil™ CORDURA® fabric
- Superlight, strong and water-resistant

Code	Description	Volume	Weight
ATLPCS	Small	3L	44g
ATLPCM	Medium	7L	56g
ATLPCL	Large	12L	66g

## TravellingLight® SHIRT FOLDERS

Finally a quick and easy, lightweight solution to keeping business shirts and trousers crease-free while travelling. Just as effective for carry-on or checked luggage, our TravellingLight® Shirt Folders have an adjustable hook-and-loop closing system to ensure different clothing combinations remain secure inside.

- Adjustable hook-and-loop closure secures contents in place
- Mesh panels keeps clothes fresh
- Packs flat for storage
- 30D Ultra-Sil™ CORDURA® fabric
- Super light, strong and water-resistant

Code	Description	Volume	Weight

## TravellingLight® LAUNDRY BAG

Keep dirty laundry separate from clean clothes with our TravellingLight® Laundry Bag. The perfect size for travel, it's ideal for transporting washing to and from the laundromat, it packs flat when not in use and has convenient grab tabs and drawstrings for easy access.

- Convenient portable laundry basket
- Easy to use double drawstring closure with strong grab tags
- Mesh front and back panels for breathability
- Packs flat for storage
- Superlight, strong and water resistant Ultra-Sil™ fabric made with CORDURA® yarn

Code	Weight
ATLL	80g

# TravellingLight® SECURITY

TravellingLight® protects documents, passports, money and other valuables so you can travel with confidence.

## RFID PROTECTION

A technical range of travel security products protecting against digital theft

Most bank cards and passports have RFID technology to store data which can be accessed by RFID scanners at retail outlets or immigration checkpoints. There is a danger that thieves can digitally access this information by covertly using RFID scanners from a distance. RFID-proof fabric does not allow scanner radio frequencies to pass through it, restricting digital access to your personal information.

Sea to Summit's range of travel safety products are lined with RFID-proof fabric. The copper-nickel plated fabric is visible on the inside of some pockets. The range is constructed with water and abrasion resistant Ultra-Sil™ fabric to reduce weight while maintaining durability.

### TravellingLight® TRAVEL WALLET RFID

These lightweight, strong and water resistant wallets provide a convenient way to keep all of your essential travel documents, cards, notes and coins organised and safe. All wallets are lined with RFID-proof fabric to protect against digital theft. Our Travel Wallets come with a range of internal pockets and card sleeves, gusseted cash pocket, as well as a zippered coin holder. The medium and large size can hold passports.

- Full YKK® zippered closure keeps contents secure
- Secure internal YKK® zipper pockets with divided sections
- Lined with water/perspiration-resistant Ultra-Sil™ fabric and RFID-proof fabric
- Small features four card slots and two banknote sleeves
- Medium features seven card slots, two large sleeves, pen holder and zippered coin holder

### TravellingLight® NECK POUCH RFID

Our Neck Pouch RFID range offers simple travel security in a high-tech package. With two or three pocket options the Neck Pouch is ideal for keeping your passport and spare cash secure. They are constructed from Ultra-Sil™ fabric for lightweight durability and lined with RFID-proof fabric to protect against the dangers of digital theft.

Soft 3D air-mesh on the back keeps the pouch comfortable against your skin. The small is a great size for passports and a couple of credit cards.

- Lined with RFID-proof fabric to protect against digital theft
- Keep money, passport and tickets safe and accessible
- Small is a compact passport size featuring two pockets
- Large is a traditional size pouch and features three pockets
- Soft 3D mesh for comfort against your skin
- Low profile design to conceal your travel valuables
- Adjustable and comfortable webbing neck strap

Small has two pockets and fits most passports

Large features three pockets for easy organisation

Code	Description	Weight	Dimensions
ATLNPRFIDS	Small	20g	125 x 150mm
ATLNPRFIDL	Large	28.5g	125 x 195mm

### TravellingLight® NECK WALLET RFID

Our Neck Wallet RFID is the premium option for 'under the shirt' security. It features many pockets including two zippered pockets perfect for passports, credit cards, and spare coins. Constructed from Ultra-Sil™ fabric for lightweight durability and lined with RFID-proof fabric to protect against the dangers of digital theft.

Soft 3D air-mesh on the back keeps the neck wallet comfortable against your skin.

- Lined with RFID-proof fabric to protect against digital theft
- Keep money, passport and tickets safe and accessible
- Neck Wallet has five pockets
- Soft 3D mesh for comfort against your skin
- Low profile design to conceal your travel valuables
- Soft, comfortable webbing neck strap

With five pockets including small and large zippered sections the Neck Wallet RFID can keep you secure and organised

Code	Weight	Size
ATLNWRFID	40g	125 x 210mm

### TravellingLight® MONEY BELT RFID

Classic money belt design made from technical fabrics to provide contemporary protection while travelling. Our Money Belt RFID has an easy-to-use buckle and adjustable brushed elastic waist belt for comfort against your skin. Two zippered pockets with different sized compartments to suit coins, notes, passports and tickets.

- Made from Ultra-Sil™ and lined with RFID-proof fabric
- Two zippered pockets with multiple compartments
- Soft 3D mesh for comfort against your skin
- Extra soft, brushed elastic waist belt

Code	Weight	Size
ATLMRFID	59g	270 x 120mm

### TravellingLight® CARD HOLDER RFID

Our slim Card Holder RFID protects your credit card information from digital skimmers. The 210D exterior makes it sturdy enough to be a stand alone wallet, while the flat design allows it to be stored within your favourite wallet. Four internal card sleeves can hold multiple cards or folded cash with a diagonal elastic loop to keep card holder closed and secure.

Code	Weight	Size
ATLCHRFID	14g	95 x 70mm

## TravellingLight® TSA TRAVEL LOCKS

Combination    Combo Cable    Cardkey

With airport security increasing, we want you to arrive at your destination with your luggage still locked and secure, without having your padlocks cut off or worse, your zip sliders cut off. All our padlocks are Travel Sentry® approved and feature the Red Diamond, alerting the TSA and other airport security agencies that they can open this lock without destroying it.

### TSA TRAVEL LOCK — COMBINATION

A lightweight three-dial combination lock, perfect for lockable zip sliders and joining most double-pull zips.

### TSA TRAVEL LOCK — COMBO CABLE

Adds versatility for oversize zips or unusual closures and keeping several bags together.

### TSA TRAVEL LOCK — CARDKEY

A very lightweight lock with cable unlocks with credit card and keyring sized key-cards you keep in your wallet or travel documents.

# DUFFLE BAG

Our Sea to Summit Duffle is more versatile, easier to use and more comfortable to carry than any other duffle at base camp

Perfect for hauling gear on your back, shoulder or yak, the interchangeable handles provide three easy carry modes and the magnetic handle keeper perfectly positions the handles ready for use. Strong enough to withstand the pressure of an overfilled bag, the anti-theft dual zipper has large t-bar zip pulls for snag-free access. Constructed for rugged durability, the broad base provides stability while the large padded lid opens wide for easy packing and fast access.

Large lid for easy packing and fast access to gear

Multi-functional handles provide 3 versatile carry options

Large T-Bar zip pulls

Dual-zipper is super durable and anti-theft

High strength hooks allow quick change of handle position

Streamlined magnetic handle keeper

## Ultra-Sil™ NANO™ SHOPPING BAG

NEW

Exceptionally compact  
- the size of an egg

Large carrying  
capacity

Sea to Summit's 30g egg-sized Ultra-Sil™ Nano™ Shopping Bag is our most compact and reusable alternative to disposable shopping bags

Super lightweight and packable, our Ultra-Sil™ Nano™ Shopping Bag is easily stashed in your car, pocket, purse or keyring so it's always on-hand for that unexpected trip to the store.

Constructed using lightweight 15D siliconised Nylon, its generous 25L capacity supported by reinforced bar-tacks and streamlined panelling, easily supports loads in excess of 20kg—a lot more than you'll comfortably carry over your shoulder!

Packing down to the size of an egg with strength well beyond its 30g weight, our 25L Ultra-Sil™ Nano™ Shopping Bag easily transports the heaviest of shopping loads.

- Ultralight and strong 15D high-strength Ultra-Sil™ Nano™ Nylon fabric
- Exceptionally compact packable design
- Large 25L carrying capacity
- Large carry handles can be slung over your shoulder or comfortably held in your hand
- Siliconised Nylon fabric slippery finish for easy packing and water resistance
- Bar-tacks at stress points for added strength

## Ultra-Sil™ NANO™ DAYPACK

Exceptionally compact  
- the size of an egg

Bartacks at  
stress points for  
added strength

Our ultra lightweight, compact Nano™ Daypack is the ultimate summit and travel pack

Half the weight and pack size of our award-winning Ultra-Sil™ Daypack, it's easily stashed in your pocket or on your keyring as the perfect travel companion.

Ultralight 15D Nylon fabric, strategically positioned bar-tacks and streamlined panelling ensures maximum strength for minimal weight.

The asymmetrical zipper and siliconised Nylon Nano™ fabric helps to reduce its packed size down to that of a chicken egg.

With strength well beyond its 30g weight, our 18L Ultra-Sil™ Nano™ Daypack can carry heavy loads up to 20kg.

- Ultralight 15D high strength Nylon fabric
- Exceptionally compact packable design
- Bar-tacks at stress points for added strength
- Asymmetrical zipper design for tiny packed size
- Siliconised Nylon fabric for easy packing and water resistance

Holds 8 x Dry Daypacks or  
12 x Daypacks, Sling Bags, Shopping Bags or Duffle Bags

## Ultra-Sil™ DAYPACK

CORDURA  
FABRIC

30D ULTRA-SIL®

Since its first release in 2008 the Ultra-Sil™ Daypack has impressed users with its incredible strength-to-weight performance. The use of siliconised CORDURA® Nylon and reinforcing bar-tacks at stress points enables the Daypack to carry loads 250x its own weight. In 2017 the Ultra-Sil™ Daypack won the prestigious Backpacker Editors' Choice Gold Award for outstanding innovation in design, materials, and performance. To celebrate we have upgraded the Daypack and brought a new look to the entire Ultra-Sil™ bag range.

- Reinforced shoulder straps to reduce bunching up when carrying heavy loads and ergonomically shaped for better fit
- Webbing daisy-chain on front for a bike light
- Made from Ultra-Sil™ CORDURA® Nylon with Polyurethane (PU) coating providing a hydrostatic waterhead of 2000mm
- Ultra-Sil™ stuff sack with handy aluminium carabiner
- Large capacity, great for lightweight travel
- Packs down small to fit easily in pockets, purses or luggage
- Lightweight at only 72g
- Slatwall, gridmesh, and countertop compatible point-of-sale display accommodates 12 Daypacks

Code	Capacity	Weight
AUDP	20L	72g

## Ultra-Sil™ DRY DAYPACK

Made from siliconised CORDURA® fabric, this ultra-lightweight and compact day pack is waterproof and packs into its own tiny stuff sack complete with an aluminium carabiner key ring attachment. Double stitched seams, sealed with high density PU seam tape, finish off the quality construction. The unique non-wicking closure strip ensures moisture is not drawn into the bag when rolled shut while the compression lacing system provides secure storage.

- Upgraded reinforced shoulder straps to reduce bunching up when carrying heavy loads and ergonomically shaped for better fit
- Made from Ultra-Sil™ CORDURA® Nylon with Polyurethane (PU) coating providing a hydrostatic waterhead of 2000mm
- Ultra-Sil™ stuff sack with handy aluminium carabiner
- Double stitched seams and fully tape sealed construction
- Elasticised compression lacing system
- Not intended for situations where pack will be submerged
- Slatwall, gridmesh, and countertop compatible point-of-sale display accommodates 8 Dry Daypacks

# DRYPACKS

High performance waterproof daypacks for all your outdoor adventures

Sea to Summit DryPacks combine our manufacturing expertise in creating waterproof products with comfortable and high-performance pack design. Our DryPacks will give you the confidence to venture out on any adventure, no matter the weather, without worrying about the contents of your pack getting waterlogged.

## 420D Series RAPID™ & FLOW™

Made of TPU laminated, 420D Nylon with fully seam sealed construction, these rugged daypacks are the obvious choice for any adventure into wet, rainy or snowy terrain. The top loading main chamber has a waterproof roll-top closure with side straps to maintain a streamlined, minimal design. The ventilated and perforated shoulder straps, removable waist strap, and ergonomic back shape provide comfort even with heavy loads. The inside is white for better visibility of contents and has a zippered pocket that keeps smaller items from disappearing to the bottom of the pack.

**The Rapid™ 26L DryPack** has stretch mesh side pockets and a large exterior zippered pocket.

**The Flow™ 35L DryPack** has a removable padded waist belt and features burly lash loops to fit Sea to Summit Accessory Straps or bungee cord. Together with the hook release compression straps on both sides, the Flow offers numerous options for attaching gear. It also has a large exterior zippered pocket.

## 210D Series SPRINT™

Combining a mix of 420D Nylon on the base for abrasion resistance, and TPU laminated 210D Nylon in the main compartment to reduce weight, the Sprint™ 20L DryPack offers waterproof performance in a sleek and slimline package. To maintain the balance between weight and performance we have created a lightweight 3D mesh harness which still offers amazing ventilation and carrying comfort. The Sprint™ DryPack is seam sealed throughout, and fastened with a non-wicking roll-top closure for maximum waterproofing. An internal zippered pocket and supplied bungee cord rounds out the package.

- Waterproof TPU laminated fabrics
- White PU Coating on the inside of the bag provides better contents visibility
- Top loading roll-top main chambers
- Fully seam sealed construction
- Streamlined, minimal design
- Internal zippered pockets for small items
- Ventilating, perforated shoulder straps

# HYDRAULIC™ DRYPACK

with removable harness.

The removable harness on our Hydraulic™ DryPack makes portaging a whole lot easier—whether on the river, in the airport or out in the field. The Hydraulic™ Dry Pack is a great option for carrying large volumes of gear when a traditional backpack just isn't suitable.

The Hydraulic™ harness is an open construction of EVA foam and air mesh, allowing plenty of air flow and rapid drying without sacrificing comfort. The removable harness attaches to compatible Hydraulic™ Dry Bags with a series of aluminium buckles as tough as the bags themselves.

- Comfortable, quick drying EVA foam straps and air mesh harness
- 600D TPU laminated heavy duty waterproof fabric
- Aluminium buckles are robust and fail safe
- Fully adjustable back length and height adjustable sternum straps
- Easy to put on and take off removable harness
- Low-profile attachment points to reduce snagging when harness is not attached
- Non-wicking TPU roll-top closure with innovative interlocking profile that is secure and waterproof
- Welded construction for permanently sealed seams
- Durable UV resistant PVC-free fabric withstands cold temperatures
- High performance abrasion resistant fabric
- Oval base to resist rolling
- Features a replaceable buckle with stainless steel pins
- Lash loops for secure attachment

# DRY STORAGE

With the range of Sea to Summit's dry storage options spanning from the ultra-light Nano™ Dry Sacks to the super burly 600D Hydraulics™, it's important to know which product is the right choice for the intended use and activity. For instance, feather-weight fabrics like Ultra-Sil™ are ideal for backpackers, but in environments where higher abrasion resistance is required the Big River™, Stopper™ or Hydraulic™ fabrics are recommended.

## Ultra-Sil™ NANO DRY SACK

15D ULTRA-SIL™

Designed for the gram-conscious backpacker, 15 denier siliconised Nylon is laminated with Polyurethane to create our featherweight Ultra-Sil™ Nano fabric that still offers a hydrostatic waterhead greater than 1200mm.

- Ultra-Sil™ Nano 15D Nylon fabric for advanced strength-to-weight performance
- Ultra-Sil™ Nano has a 1,200mm waterhead
- Fully seam-sealed for water resistance
- Reinforced stitching for greater seam strength on all stress points
- Non-wicking closure strip ensures moisture is not drawn into the bag when rolled shut
- Slippery siliconised fabric for easy packing
- Compact and super lightweight
- Oval base design for easy packing
- Designed for ultra light backpacking
- Includes Field Repair Buckle

## VIEW DRY SACK

70D WATERPROOF FABRIC

We've taken our versatile and durable Lightweight Dry Sack, changed it to oval shape and added a clear TPU window to easily view the contents inside.

Our new View Dry Sack allows quick identification of the contents. Particularly useful for groups sharing common gear.

Producing a bond as strong as the materials being joined, the TPU window is RF welded into the side panel.

- Assists with organisation and identification
- Flexible PU coated 70D Nylon with a 10,000mm hydrostatic waterhead
- Fully taped seams
- White interior for greater visibility of contents
- Includes Field Repair Buckle

## eVAC™ DRY SACK

70D WATERPROOF FABRIC

eVent

Our Sea to Summit eVAC™ Dry Sacks allow air to be squeezed out through the eVent® base for valve-free air expulsion. Instead of straps for compression, just roll the sack down and air is pushed out of the base. Then close the buckle and you've just saved space. These sacks are oval-shaped, rather than round so they better fit the internal contours of a backpack.

- Air permeable, waterproof eVent® fabric base
- Valve-free air expelling design for compact packing
- 70D fabric for strength
- Oval base resists rolling, packs more efficiently
- Non-wicking closure strip ensures moisture is not drawn into the bag when rolled shut
- 10,000mm waterhead, lightweight durable Nylon
- All seams are double stitched and tape sealed
- White interior for better visibility of contents
- Use: storage of compressible contents, such as clothes and sleeping bags
- Includes Field Repair Buckle

## Big River™ DRY BAG

Rugged and durable

**420D** WATERPROOF FABRIC

PVC free

Rugged, flexible and abrasion resistant, our PVC-free Sea to Summit Big River™ Dry Bag is our go-to choice for active water sports and dusty bike trips. Featuring a roll-resistant oval shape and space saving low profile, it has durable lash loops for secure stacking and a white interior for visibility of contents.

- Super strong and abrasion resistant 420D Nylon fabric
- TPU laminated fabric with 10,000mm hydrostatic waterhead
- Waterproof, double stitched, reinforced, tape sealed seams
- Non-wicking closure strip ensures moisture is not drawn into the bag when rolled shut
- White interior for greater visibility of contents
- Durable lash loops for attachment/stacking
- Includes Field Repair Buckle

## Stopper™ DRY BAG

tpü

**210D** STOPPER FABRIC

PVC free

These fully welded dry bags are made from PVC-free 210D Nylon fabric with TPU lamination on the outer face for durability, water shedding, and abrasion resistance. The clean profile and oval base resists rolling and allows for easy packing. The high strength fabric is UV resistant and won't crack in extreme cold.

- 210D Nylon fabric with TPU laminate
- Durable and smooth water shedding exterior
- Waterproof TPU roll-top closure does not wick moisture
- All welded construction for permanently sealed seams
- PVC-free
- Includes Field Repair Buckle

Code	Size	(Oval base) x Height	Weight

## Clear Stopper™ DRY BAG

tpü

PVC free

The Clear Stopper shares the same rugged yet light construction of our regular Stopper Dry Bag but with an optical grade transparent TPU body to aid organisation and finding gear quickly.

- Fully waterproof TPU fabric is abrasion and UV resistant, impervious to cracking in extreme cold
- Keeps contents dry in wet situations where the bag is not continuously submerged
- Oval base and space saving low profile shape resists rolling and stacks easily
- Waterproof TPU roll-top closure does not wick moisture
- Optic grade clear TPU resists yellowing with age
- Welded construction for permanently sealed seams
- Durable and smooth water shedding exterior
- PVC-free
- Includes Field Repair Buckle

## Hydraulic™ DRY BAG

Our most rugged dry bag.

This super heavy duty dry bag is specifically designed to perform in extreme conditions where toughness and abrasion resistance are required. The Hydraulic™ is made from 600D TPU laminated fabric with a completely welded construction for durable waterproof seams and a snag-free seam profile. The fabric is PVC-free and UV resistant. It sheds water and does not crack in extreme cold.

The unique moulded interlocking closure securely seals the bag for waterproof performance. The dry bags have an oval base to resist rolling and take less room when stacked. Heavy duty durable lash loops are High Frequency welded at the sides and provide secure attachment or lashing points.

- 600D, TPU laminated heavy duty waterproof fabric
- Non-wicking TPU roll-top closure with innovative interlocking profile that is secure and waterproof
- Welded construction for permanently sealed seams
- Durable UV resistant PVC-free fabric withstands cold temperatures
- High performance abrasion resistant fabric
- Oval base to resist rolling
- Features a replaceable buckle with stainless steel pins
- Lash loops for secure attachment
- Includes Field Repair Buckle

## Ultra-Sil™ COMPRESSION DRY SACK

eVent

CORDURA  
FABRIC

30D ULTRA-SIL®

Based on the success of our Compression Dry Sack, we've made a lightweight version from 30D Ultra-Sil™. We retained all the clever functionality of the original compression dry sack, with all the lightweight touches of our Ultra-Sil™ technology. The Ultra-Sil™ Compression Dry Sack compresses gear to one-third the volume while keeping it dry.

- Ultra-Sil™ 30D siliconised high-tenacity CORDURA® Nylon fabric for exceptional strength
- Ultra-Sil™ fabric has a 2,000mm waterhead
- Waterproof seams, double stitched and fully tape sealed
- Waterproof and air permeable eVent® fabric base
- Non-wicking closure strip ensures moisture is not drawn into the bag when rolled shut
- Reinforced stitching on all stress points
- Air compresses out, water cannot get in
- 40% lighter than the 70D Compression Dry Sack
- Includes Field Repair Buckle

Code	Size	ø x Height	Weight	Max/Min
AUCDS2XS	2XS / 3.3L	ø13 x 25cm	50g	3.3L to 1.3L
AUCDSXS	XS / 6L	ø15 x 35cm	56g	6L to 2L

## Nylon COMPRESSION DRY SACK

eVent

70D WATERPROOF  
FABRIC

70D WATERPROOF  
FABRIC

We were the first company to introduce a compression dry sack to the market which does not use a purge valve. This innovation uses air permeable eVent® fabric on the base, which allows air to be pushed out of the sack, while stopping water getting in. This is a lighter, simpler and more reliable solution than a purge valve. The body is made of a tough 70D polyurethane-coated fabric. It has a non-wicking roll-top closure like the rest of our dry sack range and a lid with four straps for even compression.

- 10,000mm waterhead, rugged 70D Nylon body and lid
- Double stitched and tape sealed seams
- Non-wicking roll-top closure with lid
- Bar tack reinforced stress points
- White interior for better visibility of contents
- Pull handle on the bottom
- Use: storage of compressible contents, such as clothes and sleeping bags
- Includes Field Repair Buckle

Code	Size	ø x Height	Weight	Max/Min
ADCSXS	XS / 6L	ø15 x 35cm	107g	6L to 2L
ADCSS	S / 10L	ø18 x 40cm	129g	10L to 3.3L
ADCSM	M / 14L	ø20 x 46cm	148g	14L to 4.5L

ADCSXL	XL / 30L	ø27 x 58cm	210g	30L to 10L

## Lightweight SLING DRY BAG

70D WATERPROOF  
FABRIC

Our Sling Dry Bags offer an easy way to carry your gear with the benefit of waterproof protection. Perfect for the beach, the pool or even on a jaunt through a tropical downpour. The 70D Nylon fabric offers great durability and strength and is tested to provide a hydrostatic waterhead greater than 10,000mm. We have used a slim 20mm webbing to create a convenient carry strap. The webbing length can be easily adjusted with the tri-glide buckle, and the swivel clip lets you open and close the roll-top closure without detaching the webbing strap.

- Strong and durable 70D Nylon fabric
- White PU Coating on the inside of the bag provides better visibility of contents
- Sits comfortably when being carried across a shoulder
- Available in 10L and 20L sizes
- Includes Field Repair Buckle

Blue Yellow Red

Code	Size	Dimensions	Weight

ASBAG20L	20L	[27 x 17] x 60cm	114g

## TPU Guide ACCESSORY CASE

Our fully waterproof TPU Guide Accessory Case is exceptionally resistant to the demands of the trail or river. Welded construction and a super reliable double fold and double hook-and-loop roll-top closure provides complete waterproof and dust proof performance. The PVC-free TPU material is strong, durable, flexible and resistant to UV and extreme cold—so it can be folded numerous times for pocket storage without cracking or discolouring. Features top corner anchor points for versatility.

- Meets IPX8 testing standards of being waterproof at 10 metres for one hour when used correctly
- Watertight roll-top closure
- Top corner anchor points
- Convenient neck strap included
- Flexible and crease resistant
- Freeze proof—will not crack
- High strength, PVC-free TPU material
- A touch-screen device will work inside the case

## TPU Guide MAP CASE

Made with TPU, totally welded construction and a super strong closure to provide fully waterproof and dust proof performance. The PVC-free TPU material is strong, durable, flexible and resistant to UV and extreme cold—so it can be folded numerous times vertically or horizontally for pocket storage without cracking or discolouring. Designed with a detachable neck strap and corner anchor points for versatility.

- Totally welded construction—no stitches
- Anchor points on all corners for versatility
- Super strong zip lock closure
- Detachable neck strap
- Flexible and crease resistant
- UV resistant for superior long lasting clarity
- Freeze proof—will not crack in extreme cold
- Abrasion resistant, high strength, PVC-free, TPU material

## Waterproof MAP CASE

Waterproof and dust proof protection for maps, documents or anything you need to keep dry. Adventure racers love the adjustable neck strap feature and mountain bikers can thread the strap to their handle bars.

- Waterproof welded roll-top case
- Abrasion resistant, high strength, PVC-free, TPU material
- Adjustable webbing neck strap

Code	Size	Internal Dimensions	Weight
AWMCS	Small	210 x 300mm	60g
AWMCL	Large	280 x 330mm	80g

## TPU Guide WATERPROOF CASE for iPhone® and Smartphones

Our TPU Guide Waterproof Phone Cases are a slim yet robust solution for protecting and using your phone in any condition. RF welded Thermoplastic Polyurethane (TPU) and the zip-lock, triple-roll velcro closure keeps this soft case both watertight and slim. The TPU is PVC-free, strong, flexible, durable, UV and extreme cold resistant. Die-cut attachment points round out this tough little package. XL size fits iPhone 8 plus, Samsung Galaxy Note 8, Google Pixel 2 XL and many other large smartphones.

- Meets IPX8 testing standards - waterproof at 10 metres for one hour
- Low profile design feels great in your hand
- High strength TPU construction is abrasion and UV resistant; will not crack in extreme cold
- RF welded seams for strength and waterproofness
- 0.2mm optic grade and touch compatible TPU screen and camera port

# FIRST AID DRY SACK

Our First Aid Dry Sack protects life-saving supplies from bad weather and abrasive environments

Our First Aid Dry Sack keeps your first aid kit dry and protected so its important medical contents are intact and ready to use when needed. Saturated bandages or damaged supplies can turn a serious situation into a life-threatening one.

Made from high performance 70D Nylon fabric, our First Aid Dry Sacks are highly abrasion resistant and fully waterproof with a 10,000mm waterhead and taped seams.

The easily identifiable red fabric and university recognised printed white cross make it stand out amongst other gear.

A clear TPU welded window on the side allows visibility of contents and assists fast access to important supplies. The side-release buckle or D-ring provide versatile attachment points so your kit can be carried within easy reach.

The 1L and 3L First Aid Dry Sacks are perfect for homemade kits where small items need to be protected and located quickly. The 1L bag is sized to suit day-use first aid kits and the 3L fits most overnight kits.

The 5L First Aid Dry Sack has an extra wide roll-top so most large store-bought and expedition first aid kits will fit inside.

- Emergency red fabric printed with the international standard for first aid kits (ISO 7010)
- Durable, waterproof protection for your first aid kit
- Clear window for easy identification of contents
- 5L model has extra wide roll-top to fit large kits
- Fully seam sealed waterproof 70D Nylon fabric
- Non-wicking closure strip ensures moisture is not drawn into the bag when rolled shut
- White inner coating for better interior visibility
- Oval base suits typical first aid kit dimensions
- Reinforced stitching on all stress points
- Soft and flexible to fit into tight spaces

Non-wicking roll-top closure

Abrasion resistant

Clear window for easy identification of contents

# STORAGE SACKS

## Ultra-Mesh™ STUFF SACK

150D ULTRA-MESH™  
310 HOLES PER CM

Ultra-Mesh™ Stuff Sacks are some of the lightest stuff sacks available. We use an advanced 15D multi-filament Nylon mesh only recently developed. These stuff sacks are 45% lighter than our Ultra-Sil™ stuff sacks and have to be seen to appreciate how small and light they really are!

- 15D multi-filament Nylon mesh for strength
- Ultra-Sil™ Nano drawcord throat in assorted colours for smooth operation
- Sea to Summit logo label and size label used to pull stuff sack open
- Double stitched and reinforced seams for greater durability
- Black mesh for better visibility
- Blue: 2XS, M, 2XL; Lime: XS, L; Orange: S, XL

## Ultra-Sil™ STUFF SACK

300D ULTRA-SIL®

Our Ultra-Sil™ Stuff Sacks are super strong and lightweight. We use ultra-light ripstop CORDURA® fabric in a great range of colours.

- Made of 300D ripstop siliconised CORDURA®
- The fabric is impregnated with silicone providing a hydrostatic waterhead of 2,000mm
- Fabric has a slippery finish for easy packing
- Durable pull tab at top
- Reinforced pull handle on bottom
- Uses a light and compact cord and cord lock for top closure
- Bar tack reinforced at all stress points
- All seams are double stitched for extra strength

## Nylon STUFF SACK

70D WATERPROOF FABRIC

A durable stuff sack that will accommodate all your organisational needs, we've designed our Nylon Stuff Sacks to completely eliminate throat fraying, cord pulling out and side seam splits.

- Made of 70D polyurethane coated Nylon
- 2,000mm hydrostatic waterhead fabric
- Unique tear-proof drawcord top opening
- Round bases with webbing pull handle on base
- All stress points bar tacked and fabric edges over locked
- White interior makes finding contents easy

## Nylon COMPRESSION SACK

70D WATERPROOF FABRIC

When you need a durable compression sack this is your go to. A classic design that will help compact the contents of your pack.

- Made of 70D polyurethane coated Nylon
- 2,000mm hydrostatic waterhead fabric
- Extra long straps so these sacks can be filled to capacity
- Flip-top-lid design prevents strap tangling
- Four straps for even compression
- Nylon webbing pull handle on bottom

## Ultra-Sil™ COMPRESSION SACK

CORDURA FABRIC

30D ULTRA-SIL®

When you need to compress your gear without adding weight Ultra-Sil™ Compression Sacks are the perfect choice. The size range includes two extra small sizes ideal for compressing and storing down jackets and other clothing.

- 30D diamond ripstop siliconised CORDURA® fabric
- Flip-top-lid design prevents strap tangling
- Four straps for even compression
- Extra long straps so these sacks can be filled to capacity
- Bar-tack reinforced stress points
- Pull handle on the bottom
- Slippery finish for easy packing

## TIE DOWNS with silicone cam cover

Lashing Capacity  
300kg  
661lb  
Standards: AS/NZS4380, EN 12 195-2

Our UV stable polyester webbing Tie Down straps are a great way to secure any load. The silicone cover protects your craft from the rugged metal cam. Sold as pairs.

- Durable silicone cam protection
- Colour coded according to size
- Includes elastic loop to keep strap rolled up
- UV protected 28mm polyester, easy feed webbing
- Lashing capacity 300kg AS/NZS4380, EN 12 195-2

Code	Length	Colour
SOLTDCDP35	3.5m Pair	Blue / Lime
SOLTDCDP45	4.5m Pair	Lime / Orange
SOLTDCDP55	5.5m Pair	Red / Blue

## BOMBER TIE DOWN

Lashing Capacity  
250kg  
551lb  
Standards: AS/NZS4380, EN 12 195-2

Our all purpose Bomber Tie Down features die cast nickel plated zinc alloy buckles with a rubber protector pad. The 25mm UV stable polyester webbing is kept neatly coiled when not in use by a handy, colour-coordinated elasticised retainer.

- 25mm polyester easy feed webbing, UV stabilised
- Heavy duty die cast buckle with rubber protector pad
- Includes elastic loop to keep strap rolled up
- Available in three colour coded lengths: 2m, 3m and 4m
- Lashing capacity up to 250kg AS/NZS 4380, EN 12 195-2

Elastic keeper helps organise your straps

Silicone protector pad keeps your goods safe

Code	Length	Colour
SOLBTD2	2m Single	Lime
SOLBTD3	3m Single	Orange
SOLBTD4	4m Single	Blue

## BOMBER LOOP LOCK

Lashing Capacity  
125kg  
275lb  
Standards: AS/NZS4380

Our Bomber Loop Lock is a two-piece tie down with bar-tacked loops at each end. By feeding the webbing tail through the loop the tie down can be locked to two separate anchor points for versatile and secure attachment.

- Double bar-tacked loops at both ends
- Heavy duty die cast buckle with silicone protector pad
- 25mm polyester easy feed webbing, UV stabilised
- Includes excess webbing retainer
- Available in three colour-coded lengths: 2m, 3m and 4m
- Lashing capacity up to 125kg AS/NZS 4380

By threading the webbing through the loop the tie down is securely locked to the anchor point

Code	Length	Colour
ABLL2	2m Single	Lime / Grey
ABLL3	3m Single	Orange / Grey
ABLL4	4m Single	Blue / Grey

## CARTS

For kayaks, canoes and SUP boards

Constructed using puncture-proof solid wheels and oversized anodised 25mm aluminium alloy tubing for strength, our collapsible Carts can withstand the roughest terrain.

- Durable, lightweight and compact construction
- Strong and durable tension straps last longer than traditional webbing
- Oversized anodised alloy tubing for added strength and longevity
- Small: 28cm wide - Kayaks  
Medium: 46cm wide - Canoes
- Each cart has a capacity of 70kg and includes a high quality UV stabilised polyester tie down with silicone buckle bumper

Code	Size	Colour	Depth	Height w/wheels
SOLCARTSO	Small	Orange	20cm	30cm
SOLCARTMB	Medium	Blue	28cm	35cm

## SIT-ON-TOP CART

Transporting a sit-on-top boat can be quite challenging due to the large width and the often heavier weight of this style of paddle craft. We set out to create a unique sit-on-top trolley that was universal in application and robust enough to cater for the large range of boats that fit within this category.

The patent pending design features unique tapered cones that fit snugly into a broad range of scupper hole sizes while also reducing side to side movement of your trolley while towing. We have added a variable width axle with a heavy duty quick release clamp that will fit most recreational sit-on-tops.

Our Sit-on-Top Cart can be used with or without a tie down.

- Tapered rubber cones to fit scuppers from 24mm to 48mm
- Adjustable axle width from 180mm to 400mm
- Strong oversize anodised alloy tubing and welded construction
- A Bomber Tie Down strap (not included) can be attached to the rubber cones as an option to secure your Sit-on-Top
- Light-weight innovative design
- Puncture proof solid wheels offer great soft terrain performance

Code	Height w/wheels
SOLSOTG	51cm

## AQUARACKS™

Aquaracks™ are designed to be the simplest, strongest and most versatile storage rack around. Aquaracks™ can accommodate virtually any paddle craft on the market and allow for storage or display at almost any angle without causing damage. They are a great way to display your kayaks in-store or store your boats in the garage at home.

- Strongest, most versatile rack on the market
- Specially designed padded arms prevent damage
- Great for indoor or outdoor applications
- Capacity: 80kg
- Easy to install (mounting hardware and instructions included)

## AQUARACKS SM™

The Aquaracks SM™ take up HALF the vertical wall space of the original Aquaracks™! They are still packed with all the same great features and with a hefty capacity of up to 50kg. Designed to store or display smaller boats the Aquaracks SMs™ are perfect for whitewater or play boats, lightweight composites, smaller touring kayaks and rowing shells.

- Same great features as the original
- Use only HALF the vertical space of the standard Aquaracks™
- Capacity: 50kg

Code	Description	Capacity
SQRACK	AquaRacks - Pair	80kg
SQRACKS	AquaRacks SM - Pair	50kg

## Traveller SOFT RACKS

Our Traveller Soft Racks are a quick and easy way to get your sporting equipment on the roof and off to your favourite destination. Available in two sizes, the large Traveller Soft Racks are ideal for large canoes, wide beam watercraft or for SUP boards while the regular size is best for smaller craft. Compatible with any tie-downs.

- Three step quick fit system
- Strong removable daisy chain gives multiple tie down points
- Heavy duty die cast cam buckle and neoprene cover
- Both sizes have a wide footprint to disperse load on the roof
- Grippy base reduces rack movement for a more secure load
- Carries canoes, kayaks, sit-on-tops, surf boards, SUPs, skis, snowboards and other equipment

Code	Size	Size (length x width x height)
ATSR	Regular	86cm x 19cm x 8cm
SOLTSRL	Large	110cm x 19cm x 8cm

## PACK RACKS

Compact and functional, making travel with extra gear easy

Our Pack Racks are a soft inflatable roof rack engineered for simple installation and compact transport.

Their compact packed size makes them perfect for stowing in your bag and transporting boards, boats, skis and oversized gear when you're travelling and hiring cars.

Conveniently stowed under your car seat, they are also great for unplanned purchases at the hardware store.

Sea to Summit's multi-function Airstream™ Pumpsack comes standard with every Pack Rack. The high quality Ultra-Sil™ stuff sack stores your racks when deflated, the integrated Airstream™ Pump aids easy rack inflation and it can also be used as a projected load caution flag.

- Compact pack size makes stowing and travelling with racks easy
- Quick and simple to install
- Strong daisy chain provides multiple lash points for more secure fastening
- Multi-function Airstream™ Pumpsack for easy inflation, compact storage and a tail flag for oversize items
- Universal attachment fits a broad range of vehicles
- 420D Nylon TPU coated fabric is durable, flexible, waterproof and easy to clean
- Heavy-duty die cast cam buckle
- Compatible with most tie-downs

Code	Packed Size (WxHxD)	In-use Size (WxHxD)
APAKRAK	25x12x12cm	77x14x10 cm

Compact pack size

250mm

Daisy chain lash provides multiple lash points

Multi-function Pumpsack: stuff sack, pump, flag

## AQUASLING™

The Aquasling™ is a simple and economical solution designed to store anything from your surf boards to your sea kayaks. The great space saving design keeps your gear stored in the most low-profile position while still protecting it better than any other strap system available. Sold in pairs.

- Simple design allows a single person to easily access and store their craft
- Extremely versatile - accommodates a broad range of craft up to 90cm wide
- Reinforced Nylon and padded EVA straps
- Great for indoors and outdoors
- Capacity: 60kg
- Easy to install (mounting hardware and instructions included)

Code
SQSLING

## ACCESS DECK BAG

Our Access Deck Bag gives you easy access to essentials like sunscreen and snacks without exiting your kayak. Easily detaches from your kayak to carry with you. Ideal for day trips, overnights or longer expeditions.

- Super strong abrasion resistant 420D Nylon fabric
- Stiffener inserted to maintain shape
- Durable tabs at entry of bag
- Curved watertight zip
- Internal 70D detachable dry bag with non-wicking roll-top closure system
- Two methods of securing to your kayak: hook-and-loop strips on the base or side release buckles on the sides
- Stretch shock cord on top for increased storage
- Quick-find white TPU laminated fabric with 10,000mm waterhead
- Mesh side panels drain water

Code	Weight
ARDKBBL	520g

## SUP DECK BAG

With our Big River™ Dry Bags in mind, we shaped a dry bag specifically for use on stand-up paddle board decks. Our SUP Deck Bag fastens to your deck with carefully formulated TPU patches and the most trustworthy adhesive on the market - 3M VHB for maximum adhesion in whatever conditions you can throw at it.

There's also no reason to limit yourself to SUPs - this bag is equally useful on all manner of kayaks, boats and rafts.

- Non-wicking roll-top closure
- Self-adhesive lash points
- Aluminium hook ladderlock buckles
- Burlly 420D Nylon, same fabric as our Big River™ Dry Bags
- Durable loops

Code	Size	Weight
SOLFFPF	12L	340g

## Flexi Fit SPRAY SKIRT

The Flexi Fit skirt is for anyone who wants a multi-fitting tunnel. Having a 2mm flexible neoprene waist will increase your torso comfort over a long paddle. Available in four cockpit sizes.

- Tapered, adjustable tab for increased seal around your torso
- Super soft binding for increased comfort
- 4mm small diamond neoprene skirt with a 2mm flexible neoprene waist for extra give
- 40mm wide pull tag sewn for easy opening
- Comes in an easily merchandised package, as thin as a pizza box that can be pegged or stacked on a shelf

Code	Description	Code	Description
SOLFFSCS	Small	SOLFFSCL	Large
SOLFFSCM	Medium	SOLFFSCXL	X Large

## Inflatable PADDLE FLOAT

Paddle floats are designed to aid in self rescue. This single chamber inflatable paddle float can be used in conjunction with a paddle to stabilise a kayak in the event of a capsize, making re-entry easier. Inflation is easy using our two-way lockable valve that ensures water won't get in. We've also included a foam section for positive buoyancy when deflated so you won't lose your paddle float. Our Inflatable Paddle Float can be easily accessed via a small pouch that can be fastened onto the deck.

- Made of durable 420D Nylon
- Easy access from deck during emergency —just pull the red tab
- Includes an attached, high visibility safety whistle
- Lockable two-way valve: inflation/deflation
- Mesh paddle blade garage for water drainage
- High visibility reflective print

CODE	Inflated size	Weight
SOLIPF	40 x 28 x 18cm	215g

Mesh paddle garage for easy drainage

Quick Release deck bag

Two way lockable valve

Whistle moulded into buckle

## Foam PADDLE FLOAT

Foam paddle floats require no inflation, making them faster and easier to deploy in the event of a capsize. The streamlined design of this float makes attachment to your deck a snap and the ultra durable 420D Nylon material ensures it will stand up to the elements.

- Made of durable 420D Nylon
- Foam base doesn't require inflation
- Includes an attached, high visibility safety whistle
- Mesh paddle blade garage for water drainage
- High visibility reflective print

Code	Dimensions	Weight
SOLFFPF	45 x 28 x 11cm	2269g

## BILGE PUMP

A must have for any paddler, our double action Bige Pump is a quick and effective way to empty water from your kayak or canoe.

- Improved reinforced joints
- High volume, double action pump extracts 400ml per pump
- Marine grade 316 stainless steel screws to reduce corrosion
- Full length high visibility foam with reflective logo aids recovery
- Anodised alloy shaft reduces wear and maintains smooth action of the pump
- The 46cm length is high enough to use for single and double touring kayaks
- For use with canoe: a hose can be attached to the outlet to reach over the gunwale

Code	Length
SOLBILGE	46cm

Whistle moulded into buckle

Mesh paddle garage for easy drainage

## PADDLE GLOVES

Our neoprene Paddle Gloves protect your hands from the harsh elements, keep your hands warm and reduce the risk of blisters. Their articulated, pre-bent fingers also help to maintain grip on your paddle.

- Great protection against the sun and blisters
- Pre-bent natural grip fingers
- Grip pattern on palm

Code	Size
SOLPGS	Small
SOLPGM	Medium
SOLPGL	Large
SOLPGXL	X Large

## Ultra Flex BOOTIES

Our Ultra Flex Bootie has built on the legacy of our original, low profile, sensitive Flex Bootie. We have improved the fit with an updated last shape and added an incredibly secure closure system, whilst retaining the high sensitivity that makes this bootie a favourite. Stitching lines have been optimised to prevent chaffing from foot straps. The rubber laminated sole gives all the protection you need while also maintaining the best flex for ultimate comfort.

- Durable, low profile footwear for kayaking, stand up paddling, surfing, rafting, wind surfing, kite boarding, sailing
- Flexible, sensitive sole gives great feedback for technical pursuits
- Improved last
- Secure Y-pull strap system
- 3mm neoprene
- Grey/Lime colour

## Eclipse GLOVES

The best time to paddle is when the sun is out and the water is clear. Eclipse Gloves not only provide protection against the sun, they also help prevent blisters on those long paddles. Good hand protection will make your day more enjoyable.

- UPF50+ for protection against the sun
- Synthetic leather palms contoured with a double layer in high wear areas
- Lightweight, flexible design helps you maintain contact with your paddle
- 2mm neoprene cuff improves comfort

Code	Size
SOLEGS	Small
SOLEGM	Medium
SOLEGL	Large
SOLEGXL	X Large

## Blitz BOOTIES

The Blitz Bootie is the heavy duty workhorse in our range. It has a high cuff to overlap with wetsuits, a stiffened sole for improved portaging and protection against the gnarliest of rocks, and a very secure Y-pull strap to stop you losing your shoes in the worst dunkings. The Blitz shares the same last shape as our Ultra-Flex Booties, and the same stitch lines to prevent chaffing when using foot-straps on boats or boards.

- Rugged water booties for kayaking, rafting, portaging, wading, fishing, sailing
- High traction rubber sole for grip on wet surfaces
- Stiffened sole for added protection and walking
- Secure Y-pull strap system
- 3mm neoprene
- Black/Blue colour

SOLBLB13	13 XXXL	13

## PADDLE KEEPER

Keeps your paddle attached to your craft when resting, fishing or during the occasional swim. Also for use as a fishing rod lanyard.

- Secure paddle to water craft during ocean or whitewater kayaking
- Accordion style webbing can double its length and retract without tangling
- Nylon webbing is high strength and lightweight
- Suits standard shaft diameter between 28–32mm
- Double paddle shaft attachment that doubles back for enhanced security

Code	Shaft Diameter	Length
SOLPKEEPER	28–32mm	110–240cm

## PADDLE LEASH

Our lightweight Paddle Leash has a low profile and never leaves your side. Ideal for sea kayaking and fish kayaking.

- High quality Nylon that is both lightweight and strong
- Low profile, tangle free design
- Adjustable attachment point fits most paddles/fishing rods
- Stretchy inner cord for more flexibility
- Hook and loop closure on durable, non-slip strap for security

Code	Shaft Diameter	Length
SOLPLEASH	20–35mm	110–190cm

## Tripper KAYAK SEAT

Our Tripper Kayak Seat is a comfortable high-back paddling seat. The adjustable alloy upper back section offers support, while the lower back profile helps improve rotation and comfort during those long paddling trips.

- Thermo formed foam for increased comfort
- Adjustable alloy lumbar support
- Mid back rest allows increased shoulder rotation
- Three mesh pockets on seat back
- Long adjustable straps to fit most models of kayaks or sit-on-tops

Code
SOLTRIPPER

## Cruiser KAYAK SEAT

Our Cruiser Kayak Seat is a multi-use outdoor seat. A polypropylene lining runs the length of the seat and provides extra support both on the base and on the back. The alloy back rest is adjustable for better support and increased comfort. Attach the two forward straps to the tabs to create a comfortable camp seat.

- Thermo formed foam for increased comfort
- Adjustable alloy lumbar support
- Mid back rest allows increased shoulder rotation
- Polypropylene base and back rest helps maintain seat's integrity
- Camp seat attachments
- Long adjustable straps to fit most models of kayaks
- Features large mesh pocket and two zippered pockets with many common fishing gear attachment points

Code
SOLCRUISER

# MARKETING ASSETS

Did you know you have a wealth of our marketing assets available to use in-store and online?

We are constantly creating new content to grow awareness and educate consumers about Sea to Summit, our products, technologies and innovations, in order to drive traffic to your stores and web platforms.

Integrating our assets with your sales and marketing strategy saves you time and money while ensuring a consistent brand experience. This is a snapshot of our extensive—and fast growing— asset library.

Find the marketing resources you need—ask your sales manager for more information or contact [marketing@seatosummit.com.au](mailto:marketing@seatosummit.com.au)

## DIGITAL ASSETS

For use on websites, social media, in-store and email marketing, our digital assets include web banners, blogs and articles, social posts, EDM content, videos, animated gifs, images and packaged web content. Ask us about our sleep systems landing page and finder—both can be packaged for use on websites and interactive POS displays in-store.

## FREESTANDING BANNERS

Bring attention to a new product, category or range with our freestanding small-footprint banners. Existing artwork is available and can also be adapted to support specific campaigns.

## PROMOTIONAL ITEMS

Branded apparel, inserts and brochures are available to support key campaigns, competition giveaways and event showbags.

## WINDOW DECALS

Let everyone know your store stocks Sea to Summit!

For use on windows, vehicles or walls, these 50x10cm die-cut logo decal stickers come complete with easy-to-follow application instructions.

## LIFESTYLE IMAGE LIBRARY

Creating an in-store adventure display? Looking for inspirational imagery for your behind-the-counter installation or lightbox? Our comprehensive image library is available for branded use in-store and online.

# POINT OF SALE SOLUTIONS

Displaying product well in store increases sales.

When product is presented cohesively, with good consideration for product category and cross-selling opportunities, replenishment becomes easy and impulse purchasing increases.

## ONE-STOP GUIDE TO POS

Our Point of Sale Guide details all currently available Sea to Summit POS and provides a short summary of how each piece can most effectively be used in store. Ask your sales manager for a copy or email [marketing@seatosummit.com.au](mailto:marketing@seatosummit.com.au)
